1. Land Use Plan Meeting Dates ( for discussion only)

There are 2 more meetings for Moapa: October 18<sup>th</sup> and January 23<sup>rd</sup>

2. Nevada Department of Wildlife Muddy River Update (for discussion only)

Since 2010 they have been working to eliminate the invasive non-native tilapia. Lasts year's efforts (northern boundary of Paiute to the NV Energy plant ending at Hidden Valley Rd. crossing) have shown positive results and the native fish have begun bringing their numbers back up to a stable count. Plans are set forth to work on the next phase of the river during the first week of November. The next phase will begin at the Hidden Valley barrier to Willow Siding (where the diversion to the Bowman Reservoir is) and will include the Meadow Valley and California Wash. The pesticide (odorless and colorless) used attacks gilled species and signs will be up to notify people where not to swim during the time of treatment. Staff will detoxify the river downstream from the treated area which is purple in color but nontoxic. In order to avoid native fish being poisoned, staff will work the month prior to remove the native fish from the area being treated and will create barriers. Contact the Department of Wildlife if there are any concerns.

VI. Planning & Zoning
