#### BACKGROUND:

Project Description

General Summary

Site Address: NA

• Site Acreage: 4.2 (portion)

• Project Type: Public utility structure (utility pole with transmission lines)

• Utility Pole Height (feet): 126

Site Nan

This is a project of regional significance as defined by Title 30 as the development proposal is located within 500 feet of a local government's jurisdiction (City of Henderson). Regional Infrastructure and Services Evaluation (RISE) Reports have been submitted with the application. Based on the RISE Reports, the proposed project will not impact the existing infrastructure within the surrounding jurisdictions.

The plans depict a single public utility structure (utility pole with 230 kilovolt high voltage lines) located along the south property line within the M-1 zoned portion of the project site. The proposed utility pole is centrally located within a 60 foot wide NV Energy easement that is

oriented in a north/south direction. The overhead transmission line will proceed north and cross Warm Springs Road. The line will then turn west, along the north side of Warm Springs Road approximately 800 feet, then head northwest to terminate in the proposed NV Energy switchyard that is concurrently filed with the City of Henderson under applications CUP-2018001441 and CUP-2018001431.

#### Landscaping

Landscaping is not required or provided with this application.

#### Elevations

The plans depict a proposed utility pole with an overall height of 126 feet as measured to the top of the structure.

### Applicant's Justification

The height of the proposed pole is designed in accordance with the requirements for a 230 kilovolt high voltage line. The proposed pole height is designed specifically for the clearances of private property. No NV Energy employees will be permanently stationed at this location; however, employees will visit periodically for maintenance. The pole and overhead lines will be in operation 24 hours a day, 365 days a year.

The proposed project is compatible with adjacent uses in terms of scale, site design, and operating characteristics. The proposed pole and overhead lines will not generate traffic, noise, or odor impacts, aside from short-term temporary impacts during construction. Additionally, no impacts to existing public safety or unlity services are perceived as a result of this project. No significant adverse impacts to the existing natural environment are anticipated and the proposed pole and overhead lines will not generate a need for city/public services. In all respects, the project will add to the capacity of public services.

#### STANDARDS FOR APPROVAL:

The applicant shall demonstrate that the proposed request meets the goals and purposes of Title 30.

#### Analysis

### **Current Planning**

#### Use Permit

A use permit is a discretionary land use application that is considered on a case by case basis in consideration of Title 30 and the Comprehensive Master Plan. One of several criteria the applicant must establish is that the use is appropriate at the proposed location and demonstrate the use shall not result in a substantial or undue adverse effect on adjacent properties.

Due to the growing energy demands of Clark County and the County's location as a potential route between energy supply and demand sources, there is a need to expand or add additional public utility structures. The proposed utility pole and transmission lines comply with Policy 5 of the Aboveground Utility Plan from the Comprehensive Master Plan which encourages the development of transmission capability and interconnectivity for distributed energy. The proposed utility pole and transmission lines will connect to a proposed NV Energy switchyard located within the City of Henderson. Therefore, staff recommends approval.

#### Design Review

The height, design, and color of the proposed utility pole is similar to other existing utility poles within the surrounding area. The design of the proposed project will have minimal to no impact on the surrounding land uses and properties; therefore, start recommends approval.

### Staff Recommendation

Approval.

If this request is approved, the Board and/or Commission finds that the application is consistent with the standards and purpose immerated in the Comprehensive Master Plan, Title 30, and/or the Nevada Revised Statutes.

## PRELIMINARY STARF CONDITIONS:

### Current Rlanning

Applicant is advised that a substantial change in circumstances or regulations may
warrant denial or/added conditions to an extension of time; the extension of time may be
denied if the project has not commenced or there has been no substantial work towards
completion within the time specified; and that this application must commence within 2
years of approval date or it will expire.
