## Notice to Industry

Technical Guideline 49 – Preconstruction Procedures was approved on May 30, 2019. Technical Guideline 49 is not applicable for all projects. The Engineering Manager of Clark County Building and Fire Prevention designates projects that require the use of TG-49. Agencies have inquired about the applicability and use of TG-49. Common questions and answers are below.

### All PROJECTS

1. Is the TG-49 Appendix C – NCR Weekly Log requirement apply to all projects?  
**No. The Weekly Log is only for projects that have had a Clark County TG-49 pre-construction meeting. Agencies may use the NCR Weekly Log for any project, but is not a requirement. Agencies shall comply with BAC Section 22.02.525 (B) (1) by submitting all NCR's no later than 24 hrs. after issuance.**

### TG-49 PROJECTS

2. Do we need to include all the NCRs that have been issued for every permit number from the start of that particular project or only the ones issued from the approved date of TG-49?  
**No. As of May 30, 2019, on all projects where TG-49 is applicable, agencies shall populate the NCR Weekly Log from that week on. Agencies may populate all NCR's prior to that date, but is not a requirement.**
3. If there were no NCRs issued the previous week of the project do we still need to email the NCR Log on Monday?  
**Yes. The TG-49 Appendix C – NCR Weekly Log excel file shall be emailed to CCDBFP every Monday morning while the permit is active.**
4. Do we still continue sending the newly issued NCRs within 24 hours or wait until the following Monday to submit for the previous week?  
**No. TG-49 Appendix C – NCR Weekly Log will be submitted in lieu of daily NCR's only on projects assigned by CCDBFP Engineering Manager. Any other project shall still comply with BAC Section 22.02.525 (B) (1) by submitting all NCR's no later than 24 hrs. after issuance.**
