

Construction Site Dust Control Monitor

1. Applicant (Permittee) Information:

Company (Permittee):		# of Permits:	1
----------------------	--	----------------------	---

Air Quality Regulation Section 94.8 requires a Dust Control Monitor for any construction project that has 50 acres or more of disturbed soils. This requirement is applicable to multiple sites that are individually permitted at less than 50 acres each, if they are adjacent to one another, under common ownership, and together they have 50 acres or more of disturbed soil.
