EXECUTIVE SUMMARY

The Clark County Debt Management Policy (the "Policy") was created and established by the Board of County Commissioners (BCC) in Fiscal Year (FY) 1992-93. Nevada Revised Statute 350.013 requires the County to annually update and submit the Policy to the Clerk of the Debt Management Commission (DMC) and the State Department of Taxation. The Policy should be read in conjunction with the County's Capital Improvement Plan (CIP) and the County's Indebtedness Report as these documents are incorporated in the Policy by reference.

The Policy is comprised of three sections: ***Debt Summary, Debt Issuance Policy*** and ***Debt Statistics***. The Policy serves as a guide for determining the County's use of debt financing as a funding alternative for capital projects and establishes guidelines for the issuance of debt.

> ***Debt Summary*** - The Debt Summary presents the County's existing and proposed indebtedness to assess the County's ability to repay such indebtedness. Annual debt service requirements and the revenues pledged or available to pay the bonds are detailed by repayment source. A discussion of the County's proposed bonds is also contained in this section.
>
> ***Debt Issuance Policy*** - The Debt Issuance Policy establishes guidelines for the issuance of debt. The Department of Finance is the initial coordinator of all bond issue requests. The Debt Issuance Policy identifies the types of financing allowed, optimal terms and permitted use of financing methods. The Debt Issuance Policy is a useful tool for the effective coordination of County debt financing.
>
> ***Debt Statistics*** - This section contains additional statistical information about the County's debt and overlapping debt. Comparison and calculation of various debt ratios are also shown here. Strong debt ratios allow the County to maintain its high credit rating resulting in lower interest costs for County bonds.

State statutes limit the volume of indebtedness allowed by the County. Clark County has consistently complied with all statutory debt limitations. The County's unused statutory debt capacity is $8,831,710,997 or 82.43% of total statutory debt capacity. A discussion of legal debt limitations is included in the section entitled "Statutory Debt Capacity."

Credit ratings indicate to potential buyers whether a governmental entity is considered a good credit risk. Credit ratings issued by the bond rating agencies are a major factor in determining the cost of borrowed funds in the municipal bond market. Moody's Investors Service and Standard & Poor's are two of the principal rating agencies for municipal debt. Standard and Poor's has maintained their ratings of Clark County's General Obligation bonds "AA+". Moody's has maintained their rating of the County as "Aa1." Copies of the most recent rating reports are located in Appendix C.

The County's Policy complies with Amended Securities and Exchange Commission Rule 15c2-12 (the "Rule") by requiring secondary market disclosure for all long-term debt obligations which are subject to the Rule. The County has submitted annual financial information to all nationally recognized municipal securities repositories pursuant to the Rule. A description of the County's policy for compliance is included in the "Debt Issuance Policy" section.

This policy includes descriptions and debt service schedules for all Clark County General Obligation debt issues. It also includes summary information for revenue and special assessment debt. Even though some of their debt issuances are captured in this document (by virtue of their Clark County General Obligation commitment) this policy does not constitute a Debt Management Report for, among others, the Las Vegas Valley Water District, Clark County Water Reclamation District, Clark County Health District, Clark County Regional Transportation Commission, or the Las Vegas Convention and Visitors Authority.

Clark County will continue to be proactive in planning for the capital improvement and infrastructure needs of its dynamic community. Conformance with the Policy, and other finance guidelines, will ensure the County's ability to meet these needs in an optimal manner and maintain its overall financial health, including its debt rating.

TABLES

DEBT SUMMARY

General Policy Statement

The purpose of the Clark County Debt Summary is to provide an overview of the County's existing and proposed debt obligations, as well as the County's ability to fund additional capital improvements.

A review of the County's debt position is important, as growth in the County continues to require additional capital financing. The County's approach to capital financing is premised on the idea that resources, as well as needs, should drive the County's debt issuance program. Proposed long-term financing is linked with the economic, demographic and financial resources expected to be available to pay for these anticipated obligations that impact the County's financial position. The County strives to ensure that, as it issues future debt, its credit quality and market access will not be impaired. However, overemphasis on debt ratios is avoided because they are only one of many factors that influence bond ratings. Long-term financing is used only after considering alternative funding sources, such as project revenues, Federal and State grants and special assessments.

Debt Capacity Guidelines

In reviewing the need to finance capital improvements and other needs with long-term debt, the County will follow these guidelines:

- The County's Direct Debt shall be maintained at a level considered manageable by the rating agencies based upon the current economic conditions including, among others, population, per capita income, and assessed valuation.

- The Department of Finance shall structure all long-term debt with prepayment options except when alternative structures are more advantageous to the County. The County will consider prepaying or defeasing portions of outstanding debt when available resources are identified.

- For bonds repaid solely with property taxes, the Department of Finance will strive for a debt service fund balance in an amount not less than the succeeding year's principal and interest requirements. The reserve fund requirements for other bonds issues will be set forth in their respective bond covenants.

Outstanding Debt

The table on the following pages lists the total outstanding debt and other obligations of the County. Information presented in subsequent tables will only represent General Obligation (G.O.) type debt. G.O. debt is legally payable from general (property tax) revenues, as a primary or secondary source of repayment, and is backed by the full faith and credit of the County. As such, the County will be obligated to pay the difference between revenues and the debt service requirements of the respective bonds from general taxes. The County has no obligation for non-G.O. type debt (e.g., Revenue Bonds), if pledged revenues are insufficient to cover the debt service.

[1] General Obligation bonds secured by the full faith, and credit and payable from all legally available funds of the County. The property tax rate available to pay these bonds is limited to the $3.64 statutory and the $5.00 constitutional limit as well as to the County's maximum operating levy and any legally available tax-overrides.

[2] General Obligation bonds and notes additionally secured by pledged revenues; if revenues are insufficient, the County is obligated to pay the difference between such revenues and debt service requirements of the respective obligations. The property tax rate available to pay these bonds is limited to the $3.64 statutory and $5.00 constitutional limit.

[3] Further information regarding the LVCVA's debt is available in their Debt Management Policy.

[4] These bonds are secured entirely by pledged revenues other than property taxes including airport and hospital revenues and motor vehicle fuel, sales and excise taxes . Economic Development Revenue Bonds issued for and payable by private companies are not included in this schedule.

[5] Secured by assessments against property improved. These bonds do not constitute a debt of the County, and the County is not liable. In the event of a delinquency in the payment of any assessment installment, the County will not have any obligation with respect to these bonds other than to apply available funds in the reserve fund and the bond fund and to cause to be commenced and pursued, foreclosure proceedings with respect to the property in question.

[6] Secured by assessments against property improved; the County's General Fund and the taxing power are contingently liable if collections of assessments are insufficient.

[7] Capital lease payments for Southern Nevada Area Communication Council (SNACC) equipment. These payments are secured by SNACC billings.

SOURCE: Clark County Department of Finance

Property Tax Supported Debt

Since fiscal year 2017, the County no longer assesses a levy for debt service. Remaining outstanding bonds are repaid from the revenues generated by such sources as room taxes, sales tax levies, the County's allocation of Consolidated Taxes (consisting of local government revenues transferred to the County by the State pursuant to an intra-county formula), as well as other taxes and fees levied on vehicles, property transfers, etc.

The following table illustrates a record of the County's assessed valuation (excluding net proceeds of mines and redevelopment agencies).

No Property Tax Supported General Obligation Bonds are anticipated to be issued in the near future. Thus, the full faith and credit of the County, supported by a property tax levy, is available as a secondary (double barrel) source of repayment for remaining outstanding bonds.

Medium-term bonds do not have a pledged revenue source, but are repaid from the unreserved General Fund revenues of the County. The property tax available to pay these bonds is limited to the $3.64 per $100 of assessed valuation statutory limit and the $5.00 per $100 of assessed valuation constitutional limit. The table on the following page lists the corresponding required debt payment for these issues.

County Debt Service and Reserve Funds

Reserve requirements and debt service reserves are specified in the bond documents for individual bond issues. Reserve and principal and interest set asides for other issues are currently in compliance with specific issue requirements.

Possible County Capital Projects Requiring Long-Term Financing Repayment Sources

The County reserves the right to issue bonds as needed. Specifically, the County reserves the privilege of issuing general obligation bonds at any time legal requirements are satisfied. The County also reserves the ability to issue general obligation bonds for refunding purposes at any time.

The County is not contemplating issuing any new general obligation or general obligation (additionally secured with pledged revenues) bonds in FY22-23.

Statutory Debt Capacity

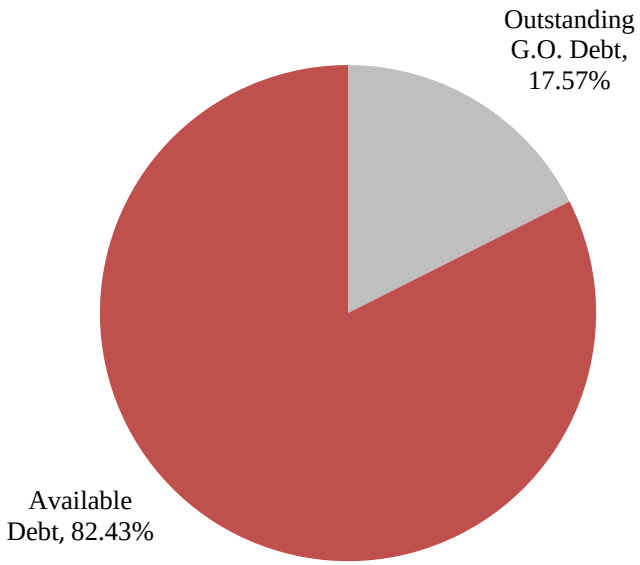
State statutes limit the aggregate principal amount of the County's general obligation indebtedness to ten percent of the County's total reported assessed valuation (including net proceeds of mines and the assessed valuation of the redevelopment agencies). Based upon the estimated Fiscal Year 2021-2022 assessed value of $107,147,198,992 the County's statutory debt limitation is $10,714,719,899. The following table represents the County's outstanding and proposed general obligation indebtedness with respect to its statutory debt limitation.

STATUTORY DEBT CAPACITY
Clark County, Nevada
June 30, 2022

Statutory Debt Limitation	$10,714,719,899
Less: Outstanding Total G.O. Indebtedness (subject to ten percent limitation)	(2,919,298,902)
Less: Proposed Capital Projects Requiring Long-Term Financing	0
Add: Senate Bill 1 Approved Debt Excluded From Debt Limitation [1]	1,036,290,000
Available Statutory Debt Limitation	$8,831,710,997

[1] Senate Bill 1, sections 36 (5) (b) and 61 (2) (b) exempts Stadium Authority and LVCVA debt (Stadium Improvement Bonds (3960.000) and (LVCVA Series 2018, LVCVA Series 2019C and LVCVA Series 2019D) from debt limitation.

SOURCE: Nevada Department of Taxation; Clark County Department of Finance



Bond Bank Debt Capacity

The County bond law provides a County debt limitation of fifteen percent of assessed valuation for general obligation bonds issued through its bond bank. This bond bank debt limitation is separate from, and in addition to, the ten percent debt limitation for the County's general obligation debt as described on the previous page. Based upon the estimated Fiscal Year 2021-2022 assessed value of $107,147,198,992 (including the assessed value of the redevelopment agencies), the County's bond bank statutory debt limitation is $16,072,079,849. The following table represents the County's outstanding and proposed bond bank indebtedness with respect to its statutory debt limitation.

BOND BANK DEBT CAPACITY
Clark County, Nevada
June 30, 2022

Statutory Debt Limitation	$16,072,079,849
Less: Outstanding Bond Bank Indebtedness	(793,555,000)
Less: Proposed Bond Bank Financed Projects	0
Available Bond Bank Statutory Debt Limitation	$15,278,524,849

SOURCE: Nevada Department of Taxation; Clark County Department of Finance

Direct Debt Comparison

A comparison of the direct debt, and debt per capita as compared with the average for such debt of other municipalities, is shown below. Direct debt is defined as a calculation of indebtedness that consists of issuances serviced primarily from the County's governmental funds that pay principal and interest payments with revenues received directly from County property taxes or medium-term issuances. Medium-term bonds do not have a pledged revenue source, but are repaid from the unreserved General Fund revenues of the County. Self-supporting general obligations, self-supporting bond bank, and self-supporting commercial paper issuances are not included in this calculation.

County	Direct Debt[1]	Estimated Population at 7/01/21[2]	FY2022 Assessed Value[3]	Direct Debt Per Capita	Direct Debt as a Percentage of Assessed Value
Clark County	$ 4,050,000	2,320,107	$107,147,198,992	$ 2	0.00%
Douglas County	2,070,000	49,082	3,763,169,274	42	0.06%
Washoe County	18,757,000	473,606	21,337,291,898	40	0.09%

Preliminary Summary and Conclusion

Recent strain in the local and national economies have necessitated closer monitoring of County debt, however, the County's direct debt is considered manageable. Clark County continues to evaluate how much tax-supported debt is prudent, (i.e. what can the tax base support? what can the taxpayers afford?).

It is important to match capital needs with economic resources on an ongoing basis to ensure that the proposed level of debt issuance does not place a constraint on maintenance of the County's credit worthiness or future credit rating improvements. In this regard, the County includes in its capital budgeting process a complete and detailed description of the anticipated sources of funds for future capital projects, as well as the resulting impact of long-term financing on the County's debt position. Periodic monitoring of issuances is performed to ensure that an erosion of the County's credit quality does not occur.

It should be recognized that changing circumstances require flexibility and revision. Clark County is one of the most unique, fastest-growing areas in the country. Anticipating every future contingency is unrealistic. When adjustments to debt plans become necessary, the reasons will be documented to demonstrate that the County's commitment to sound debt management remains unchanged.

DEBT ISSUANCE POLICY

Administration of Policy

The County Manager is the County's chief executive officer and serves at the pleasure of the Board of County Commissioners (BCC). The County Manager is ultimately responsible for administration of County financial policies. The BCC is responsible for the approval of any form of County borrowing and the details associated therewith. Unless otherwise designated, the Chief Financial Officer coordinates the administration and issuance of debt.

The Chief Financial Officer is also responsible for the attestation of disclosure and other bond related documents. References to the "County Manager or her designee" in the document are hereinafter assumed to be assigned to the Chief Financial Officer as the "designee" for administration of this policy. The County Manager may designate officials from issuing entities to discharge the provisions of this policy.

Initial Review and Communication of Intent

All borrowing requests are communicated to the Clark County Department of Finance during the annual budget process. Requests for projects, which may require a new bond issue, must be identified as a part of a Capital Improvement Program (CIP) request. Justification and requested size of the bond issue must be presented as well as the proposed timing of the project. Additionally, opportunities for refunding shall originate with, or be communicated to, the Department of Finance.

The Department of Finance, in conjunction with the County's Senior Management Team, will evaluate each proposal comparing it with other competing interests within the County. All requests will be considered in accordance with the County's overall adopted priorities. If it is determined that proposals are a Countywide priority, and require funding, the Department of Finance will coordinate the issuance of debt including size of issuance, debt structuring, repayment sources, determination of mix (e.g., debt financing versus pay-as-you-go), and method of sale.

Debt Management Commission

In Nevada, governments must present their general obligation debt proposals, (with exception of medium-term financings issued under NRS 350), to the County Debt Management Commission (the Commission). The Commission reviews the statutory debt limit, method of repayment and possible impact on other underlying or overlapping entities. When considering the possible impact on other entities, the Commission generally considers the property tax rate required versus others' need for a tax rate - all of which must fall at or below the statutory $3.64 property tax cap. The $3.64 is not usually a limiting factor. However, the cap will become an issue if local governments begin levying a property tax that is closer to $3.64. The Debt Management Commission does not generally make judgments about a proposal's impact on the debt ratios of all the affected governments.

The Commission requires that each governmental entity in the County provide a five-year forecast of operating tax rates, including a description of the projected use of the tax rate and identification of any tax rate tied to the Capital Improvement Plan. The County's forecasted tax rate schedule for the next five fiscal years is shown in Appendix D. The projected use of the tax rates listed in the Appendix D is for support of ongoing operations for each of the listed entities and/or special districts.

Types of Debt

General Obligation Bonds - Under NRS 350.580, the County may issue as general obligations any of the following types of securities:

1. Notes
2. Warrants
3. Interim debentures
4. Bonds and
5. Temporary bonds

A general obligation bond is a debt that is legally payable from general revenues, as a primary or secondary funding source of repayment, and is backed by the full faith and credit of the County, subject to certain constitutional and statutory limitations. The Nevada Constitution and State statutes limit the total taxes levied by all governmental units to an amount not to exceed $5.00, and $3.64 per $100 of assessed valuation, with a priority for taxes levied for the payment of general obligation indebtedness.

Any outstanding general obligation bonds, or temporary general obligation bonds to be exchanged for such definitive bonds and general interim debentures, constitute outstanding indebtedness of the County and exhaust the debt-incurring power of the County. Nevada statutes require that most general obligation bonds mature within 30 years from their respective issuance dates.

Bonding should be used to finance or refinance capital improvements, long-term assets, or other costs directly associated with financing a project, which has been determined to be beneficial to a significant proportion of the citizens in Clark County, and for which repayment sources have been identified. Bonding should be used only after considering alternative funding sources such as project revenues, federal and state grants, and special assessments.

Voter-approved general obligation bonds issued under this heading are used when a specific property tax is the desired repayment source.

General Obligation/Revenue Bonds - Such bonds are payable from taxes, and are additionally secured by a pledge of revenues. If pledged revenues are not sufficient, the County is obligated to pay the difference between such revenues and the debt service requirements of the respective bonds from general taxes.

Interim Debentures - Under NRS 350.672, the County is authorized to issue general obligation/special obligation interim debentures in anticipation of the proceeds of taxes, the proceeds of general obligation or revenue bonds, the proceeds of pledged revenues or any other special obligations of the County and its pledged revenues. These securities are often used in anticipation of assessment district bonds.

Revenue Bonds - Under NRS 350.582, the County may issue as special obligations any of the following types of revenue securities:

1. Notes
2. Warrants
3. Interim debentures
4. Bonds and
5. Temporary bonds

Securities issued as special obligations do not constitute outstanding indebtedness of the County nor do they exhaust its legal debt-incurring power. Bonding should be limited to projects with available revenue sources whether self-generated or dedicated from other sources. Adequate financing feasibility studies should be performed for each revenue issue. Sufficiency of revenues should continue throughout the life of the bonds.

Medium-Term General Obligation Financing - Under NRS 350.087 - 350.095, the County may issue negotiable notes or short-term negotiable bonds. Those issues, approved by the Executive Director of the Nevada Department of Taxation, are payable from all legally available funds (General Fund, etc.). The statutes do not authorize a special property tax override. The negotiable notes or bonds:

1. Must mature no later than 10 years after the date of issuance.

2. Must bear interest at a rate that does not exceed by more than 3 percent the Index of Twenty Bonds that was most recently published before the bids are received or a negotiated offer is accepted.

3. May, at the option of the County, contain a provision that allows redemption of the notes or bonds before maturity, upon such terms as the BCC determines.

4. Term of bonds may not exceed the estimated useful life of the asset to be purchased with the proceeds from the financing, if the term of the financing is more than five years.

5. Must have a medium-term financing resolution approved, which becomes effective after approval by the Executive Director of the Nevada Department of Taxation.

Certificates of Participation/Other Leases - Certificates of participation are essentially leases that are sold to the public. The lease payments are subject to annual appropriation. Investors purchase certificates representing their participation in the lease. Often, the equipment or facility being acquired serves as collateral. These securities are most useful when other means to finance are not available under state law.

Refunding – A refunding of outstanding bonds generally involves issuing new bond issue whose proceeds are used to redeem an outstanding issue. Key definitions follow:

1. Current Refunding – The refunding bonds are issued within 90 days of the initial call date of the outstanding bonds to be refunded.

2. Advance Refunding – The refunding bonds are issued more than 90 days before the initial call date of the outstanding bonds to be refunded. An advance refunding is accomplished by issuing a new bond, and/or using available funds, to invest in an escrow account composed of a portfolio of U.S. government securities that are structured to provide enough cash flow to pay debt service on the refunded bonds. The escrow legally defeases the outstanding bonds. Under the December 31, 2017 Tax Cuts and Jobs Act, interest on advanced refunding's is now taxable, while interest on current refunding's remains tax-exempt.

3. Gross Savings - Difference between the debt service on refunding bonds and refunded bonds less any contribution from other available funds, including a reserve or debt service fund.

4. Present Value Savings - Present value of gross savings discounted at the refunding bond arbitrage yield to the closing date, plus accrued interest less any contribution from available funds, including a reserve or debt service fund.

Prior to beginning a refunding bond issue, the County will review an estimate of the savings achievable from the refunding. The County may also review a pro forma schedule to estimate the savings assuming that the refunding is done at various points in the future.

The County will generally consider refunding outstanding bonds if one or more of the following conditions exist:

1. Present value savings are at least three percent of the par amount of the refunding bonds.
2. The bonds to be refunded have restrictive or outdated covenants.
3. Restructuring the debt is deemed to be desirable.

The County may pursue a refunding that does not meet the above criteria if:

1. Present value savings exceed the costs of issuing the bonds.
2. Current savings are acceptable when compared to savings that could be achieved by waiting for more favorable interest rates and/or call premiums.

Debt Structuring

Maturity Structures - The term of County debt issues may not extend beyond the useful life of the project or equipment financed. The repayment of principal on tax supported debt should generally not extend beyond 20 years unless there are compelling factors which may make it necessary to extend the term beyond this point. Under NRS 350.630, general obligations must mature within 30 years except general obligations issued for a water or wastewater facility must mature within 40 years and special obligations must mature within 50 years.

Debt issued by the County should be structured to provide for either level principal or level debt service. Deferring the repayment of principal (e.g., interest only structures) should be avoided except in select instances where it will take a period of time before project revenues are sufficient to pay debt service or if such a structure will help levelize all-in debt service. Ascending debt service should generally be avoided.

Bond Insurance - Bond insurance is an insurance policy purchased by an issuer or an underwriter for either an entire issue or specific maturities that guarantees the payment of principal and interest.

Bond insurance can be purchased directly by the County prior to the bond sale (direct purchase) or at the underwriter's option and expense (bidder's option).

The decision to purchase insurance directly versus bidder's option is based on: volatile markets, current investor demand for insured bonds, level of insurance premiums, or ability of the County to purchase bond insurance from bond proceeds.

When insurance is purchased directly by the County, the present value of the estimated debt service savings from insurance should be greater than the insurance premium. The bond insurance company will usually be chosen based on an estimate of the greatest net present value insurance benefit (present value of debt service savings less insurance premium).

Reserve Fund and Coverage Policy - A debt service reserve fund is created from the proceeds of a bond issue and/or other available funds (e.g., a debt service fund or debt service reserve fund) to provide bondholders comfort that there are available funds pledged to the payment of debt service should monies not be available from current revenues.

Debt Service Coverage - The ratio of pledged revenues (typically net revenues after payment of operating and maintenance expenses) to related debt service for a given year. For each bond issue, the Chief Financial Officer shall determine the appropriate reserve fund and coverage requirements, in accordance with the County's reserve policy. The Chief Financial Officer has determined that it is fiscally prudent for the County to maintain a reserve of approximately one year's principal and interest for its General Obligation Bonds (additionally secured with pledged revenues) and any other obligations.

Interest Rate Limitation - Under NRS 350.2011, the maximum rate of interest must not exceed:

1. for general obligations, the Index of Twenty Bonds, plus 3%; and
2. for special obligations, the Index of Revenue Bonds (which was most recently published before the bids are received or a negotiated offer is accepted), plus 3%.

Method of Sale

Bonds may be sold on a competitive or negotiated basis. Both methods allow for one or more series of bonds to be sold, depending on market conditions and the County's need for funds. Either method can provide for changing issue size, maturity amounts, term bond features, etc. The timing of competitive and negotiated sales is generally related to the requirements of the Nevada Open Meeting Law.

Competitive Sale - With a competitive sale, underwriters are invited to submit a proposal to purchase an issue of bonds. The bonds are awarded to the underwriter(s) presenting the best bid according to stipulated criteria set forth in the notice of sale (typically, the bid with the lowest True Interest Cost). Competitive sales are preferred unless market or other circumstances lead the County to conduct a negotiated sale.

Negotiated Sale - A negotiated sale is an exclusive arrangement between the issuer and an underwriter or underwriting syndicate. The underwriter and underwriting syndicate will market the bonds for sale to investors as well as underwrite bonds that have not been sold on a given day or day. The County and the underwriters will agree on the appropriate coupons, interest rates and price for the bonds to be sold. .

Negotiated underwriting may be considered upon recommendation of the Chief Financial Officer based on one or more of the criteria set forth in NRS 350.155 (2) and one or more of the following criteria:

a. Large issue size;
b. Complex financing structure (i.e., variable rate financings, derivatives and certain revenue issues, etc.) which provides a desirable benefit to the County;
c. Volatile capital markets;
d. Comparatively lesser credit rating or lack of bids; and
e. Other factors that lead the Chief Financial Officer to conclude that a competitive sale would not be effective including market conditions.

Secondary Market Disclosure

In November 1994, the Securities and Exchange Commission (SEC) amended Rule 15c2-12 (the "Rule") to prohibit any broker, dealer, or municipal securities dealer from acting as an underwriter in a primary offering of municipal securities unless the issuer promises in writing to provide certain ongoing information (unless the offering satisfies certain exemptions).

Pursuant to the SEC's Municipal Advisor Rule, it is the County's policy to retain and rely on the advice of an Independent Registered Municipal Advisor.

The County will comply with the Rule by providing the secondary market disclosure required in any case in which the Rule applies to the County as an obligated person as defined in the Rule.

The County will also require certain governmental organizations and private organizations (the "Organizations"), on behalf of which the County issues bonds or who otherwise are beneficiaries of the bonds, to comply with the Rule pursuant to a loan agreement or other appropriate financing document as a condition to providing the financing. The County is not required, nor will it obligate itself, to provide secondary market disclosure for any obligated person (other than the County) and the County will have no liability or responsibility for the secondary market disclosure requirements imposed upon other obligated persons. The County may, in appropriate cases, exempt Organizations and other obligated persons from this policy where the County determines, in its sole discretion, that an exemption permitted by the Rule is available.

Underwriter Selection for Negotiated Sale

1. Underwriter selection for bonds issued pursuant to NRS 271 (Local Improvements), which are not secured by a pledge of the taxing power and general fund of the County, may be approved via the County's guidelines for such bonds.

2. The Department of Finance, either directly or through its Municipal Advisors, will solicit proposals from underwriters to establish a pool or list of underwriting firms for negotiated sales. The Department of Finance, or the County's Municipal Advisors on behalf of the County, will distribute a Request for Proposals (RFP) to underwriting firms. The RFP will include, at a minimum, information regarding the firm's qualifications, staffing and personnel assigned to the County, fees (including takedown and management fee-if any), debt structuring, marketing, expected yield, and credit strategies. Before selecting a firm or firms, the Chief Financial Officer may, but is not required, conduct interviews of firms who submit responses to the RFP. (NRS 350.175 requires that if the bond issue is not described in the request for proposals or the sale occurs more than 6 years after the selection of the underwriter or pool, the County shall submit a request for proposals from underwriters before an underwriter is selected for the negotiated sale.)

3. The selection of underwriter(s) will be based on the overall quality of the response, qualifications of the firm, demonstrated success in pricing bonds, understanding of the County's objectives, qualifications of the banking and underwriting team to be assigned to the County, fees, applicability of the marketing and credit strategy, and relevance and quality of structuring proposals. The selection of underwriter(s) shall include, but is not limited to, the requirements of NRS 350.185.

4. The pool or list will be based, in part, on the firms who have submitted bids, in their own name or as part of a syndicate, for the County competitive issues over the prior five years. In addition, the pool or list may contain firms that have participated in other financings in Nevada (in competitive bids or negotiated sales), demonstrated ability and interest in County Financings, or have submitted financing ideas and concepts for the County's consideration over the past five years.

5. The Department of Finance will recommend a pool of underwriter(s) to the Board for ratification.

6. The Department of Finance will designate the senior manager(s) and book running senior manager if there are co-senior managers, as well as the co-managers from the firms in the pool or list. The Department of Finance will determine the length of time that the selected firms will serve as the syndicate for the County. Such a selection can be for a single transaction or multiple transactions, but the syndicate will be reviewed at intervals not greater than every five years.

7. It is the County's intent, once a team is established, to provide equal opportunity for the position of book-running senior manager.

8. The underwriting team should be balanced with firms having institutional, retail and regional sales strengths. Qualified minority and/or woman-owned firms will be included in the underwriting pool and given an equal opportunity to be senior manager.

Syndicate Policies

1. The Department of Finance will establish designations and liabilities. At a minimum, in a syndicate with three or more firms serving as co-managers, the designation rules will include a minimum of three firms to be designated, with a minimum of 5% to any firm. The Department of Finance will also determine the maximum amount to be designated to a single firm (typically 60%, but this can be higher or lower, depending upon the size of the syndicate and the par amount of the transaction.) In addition, the Department of Finance will determine the appropriate allocation of liabilities and equivalent share of compensation for group net orders.

2. Prior to the sale of bonds, the senior book running manager will submit a Syndicate Policy Memo to the Chief Financial Officer for approval. At a minimum, the Syndicate Policy Memo will include:

    - Average takedown and takedown by maturity
    - Details of Underwriter expenses, including the cost of Underwriter's Counsel
      Designation rules and compensation split among the underwriting team in the case of group net sale
    - Liabilities
    - Order priority (unless otherwise agreed by the Chief Financial Officer, the order priority will be Nevada Retail, National Retail, Group Net or Net Designated, Member)
    - Definition of a retail order (unless otherwise determined by the Chief Financial Officer, the definition of a retail order will include orders placed by individuals, bank trust department, municipal advisors and money managers acting on behalf of individuals with a maximum of $1 million per account.)
    - Assignment of SDC Credit

3. The Syndicate Policy Memo may include other relevant information (e.g., management fee or other fees, description of the sale timeline, etc.)

Underwriting Spread

Before work commences on a bond issue to be sold through a negotiated sale, the underwriter shall provide the Department of Finance with a detailed estimate of all components of his/her compensation. Such estimates should be contained in the Request for Proposals, or provided immediately after an underwriter is designated.

The book-running senior manager must provide an updated estimate of the expense component of gross spread to the Department of Finance no later than one week prior to the day of pricing.

Selling Group

The Department of Finance may establish a selling group to assist in the marketing of the bonds as warranted (based on market conditions and size of the transaction.)

Priority of Orders

The priority of orders to be established for negotiated sales follows:

1. Nevada Investors
2. Group Orders
3. Designated Orders
4. Member Orders

For underwriting syndicates with three or more underwriters, a three-firm rule for net designated orders will be established as follows:

1. The designation of takedown on net designated orders is to benefit at least three firms of the underwriting team.
2. No more than 50 percent of the takedown may be designated to any one firm. No less than 10 percent of the takedown will be designated to any one firm.

Retentions

If the use of retentions is desirable, the Department of Finance will approve the percentage (up to 30 percent) of term bonds to be set aside. The amount of total retention will be allocated to members of the underwriting team in accordance with their respective underwriting liability.

Allocation of Bonds

The book-running Senior Manager is responsible for allotment of bonds at the end of the order period. The Chief Financial Officer and the County's Municipal Advisors will review allotments to ensure the senior manager distributes bonds in a balanced and rational manner.

Miscellaneous

MBE/WBE Statement - It is a continuing goal of Clark County to actively pursue minority-owned business enterprises (MBE) and women-owned business enterprises (WBE) to take part in Clark County's procurement and contracting activity. MBE and WBE will be solicited in the same manner as non-minority firms. Clark County encourages participation by MBE and WBE owned business enterprises, and will afford full opportunity for bid submission. MBE and WBE will not be discriminated against on the grounds of race, color, creed, sex, or national origin in consideration for an award.

Bond Closings - All bond closings shall be held in Clark County unless circumstances dictate otherwise.

Gift Policy – Employees will not directly or indirectly solicit, accept, or receive any gift whether in the form of money, services, loan, travel, entertainment, hospitality, promise, or any other form. Unsolicited gifts must be returned, shared with other employees, or given to charity. Gifts, which may influence a reasonable employee in the performance of his/her duties, will be refused.

An unsolicited payment of meals with a value less than $50 may be accepted provided the acceptance of the meal is not intended to influence the employee's performance, to reward official action, or create a potential for a perception of impropriety. Employees must disclose this information to their Department Head or applicable Deputy County Manager.

Tickets provided to employees for events that may provide an opportunity to build relationships within the community must be disclosed to the employee's Department Head or applicable Deputy County Manager. Tickets that have the potential to influence a reasonable employee in the performance of his/her duties, or appear to be intended as a reward for any official action on the employee's part, or create a potential for a perception of impropriety as determined by the Department Head or applicable Deputy County Manager, will be refused.

DEBT STATISTICS

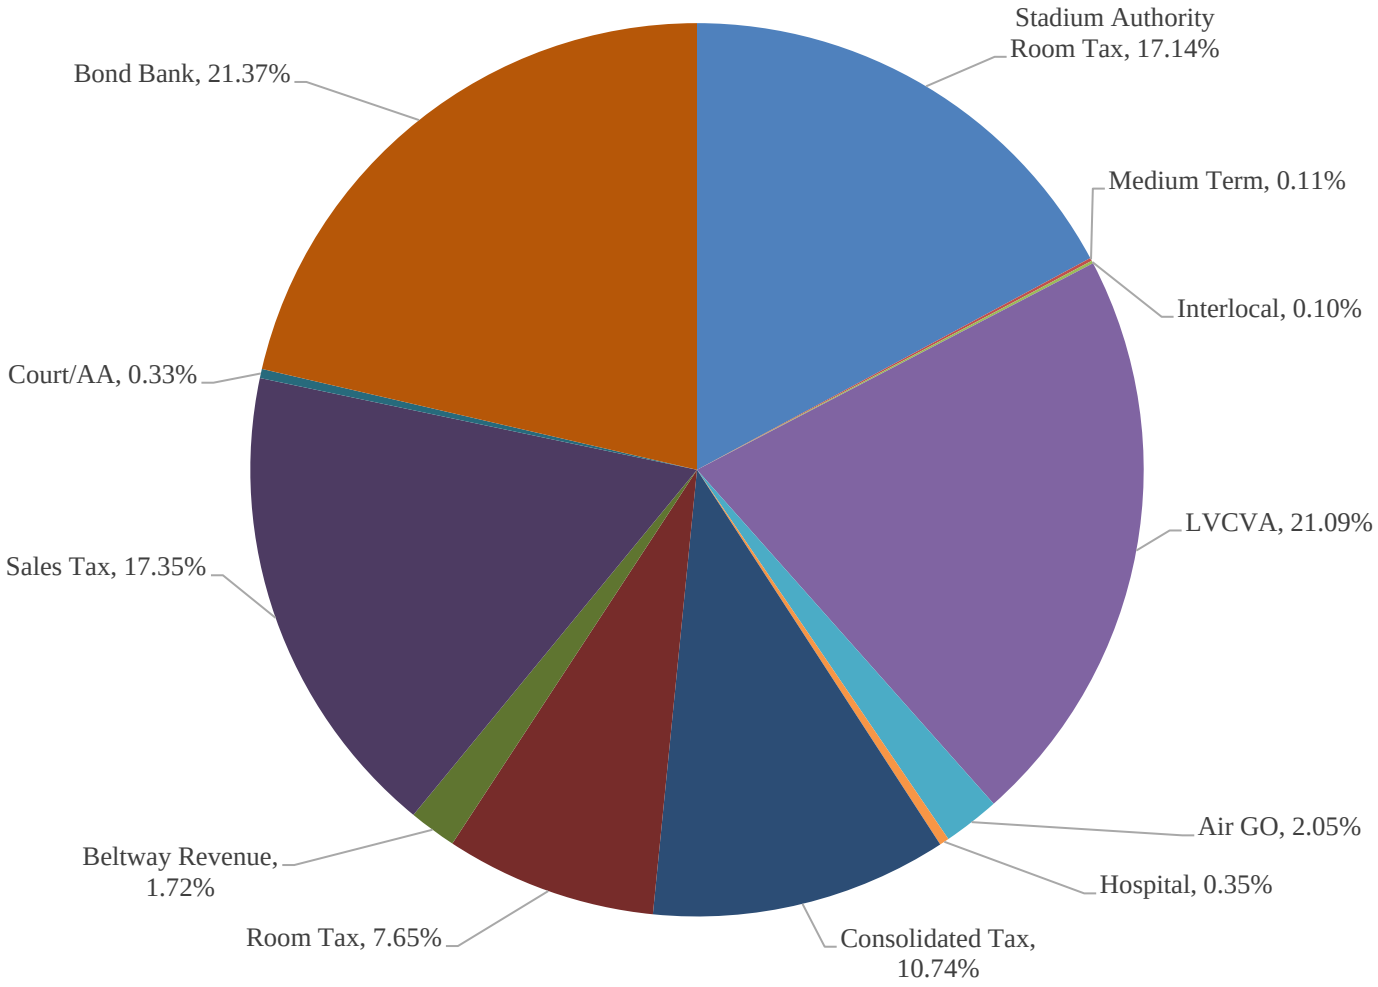
Current Debt Position Summary

In analyzing the County's debt position, credit analysts look at a variety of factors. Included in those factors are the overall debt burden and various debt ratios. The following are definitions of some of the various debt measures.

Gross Direct Debt -	A calculation of County general obligation indebtedness that consists of all debt serviced from the County's governmental funds secured directly by property tax collections, or at least includes property tax as a pledged funding source. This calculation also includes medium-term issues. Medium-term bonds do not have a pledged revenue source, but are repaid from the County's unreserved General Fund revenues.
Self - Supporting Debt -	A calculation of general obligation indebtedness that consists of all debt serviced from the County's governmental funds that is not pledged through revenues of the General Fund (medium-term issues) or does not receive property tax collection revenues as the primary funding source of annual principal and interest payments. These issues are additionally (secondarily) secured by property taxes - meaning the County may levy a general tax on all taxable property within the County to pay debt associated with these issuances.
Direct Debt -	A calculation of indebtedness that consists of issuances serviced primarily from the County's governmental funds that pay principal and interest payments with revenues received directly from County property taxes or medium-term issuances.
Indirect Debt -	Other taxing entities within the boundaries of the County are authorized to incur general obligation debt. Indirect debt is a calculation of the Direct Debt paid by County residents to governmental agencies other than the County whose jurisdictions overlap the County's boundaries.
Overall Net Tax-Supported Debt -	The combination of Direct Debt and Indirect Debt. This calculation demonstrates the total debt burden on the County's tax base.

COMPOSITION OF GROSS DIRECT DEBT
BY REPAYMENT SOURCE

June 30, 2022



The following table illustrates the County's overlapping general obligation debt.

OVERLAPPING NET GENERAL OBLIGATION INDEBTEDNESS
Clark County, Nevada
As of June 30, 2022

	Gross Direct Overlapping Debt	Self-Supporting Overlapping Debt	Percent Applicable[1]	Overlapping Net Direct Debt[2]
Clark County School District	$2,985,380,000	$312,885,000	100.00%	$2,672,495,000
City of Henderson	372,554,456	350,044,456	100.00%	22,510,000
City of Las Vegas	431,785,000	376,130,000	100.00%	55,655,000
City of Mesquite	9,732,306	9,732,306	100.00%	0
City of North Las Vegas	379,352,183	379,352,183	100.00%	0
Water Reclamation District	385,634,444	385,634,444	100.00%	0
Las Vegas Valley Water District	2,864,928,397	2,864,928,397	100.00%	0
Las Vegas/Clark Co. Library Dist.	0	0	100.00%	0
Boulder City Library District	0	0	100.00%	0
Big Bend Water District	1,357,524	1,357,524	100.00%	0
Virgin Valley Water District	10,804,960	9,050,960	100.00%	1,754,000
State of Nevada[3]	1,264,440,000	273,650,000	70.57%	699,200,503
TOTAL	$8,705,969,270	$4,962,765,270		$3,451,614,503

[1] Based on fiscal year 2022 assessed valuation in the respective jurisdiction. The percent applicable is derived by dividing the assessed valuation of the governmental entity into the assessed valuation of the County.
[2] Overlapping Net Direct Debt equals total existing general obligation indebtedness less presently self-supporting general obligation indebtedness times the percent applicable.
[3] Estimate for June 30, 2022.

Tax Supported Debt Burden

The following table shows the Direct Debt and Overall Debt ratios for the County.

EXISTING NET TAX SUPPORTED DEBT BURDEN

Clark County, Nevada Debt Position [1]:	
Gross Direct Debt 2022:	$3,712,853,902
Less: Self-Supporting Debt 2022:	3,708,803,902
Net Direct Debt 2022:	4,050,000
Overlapping Net Direct Debt:	3,451,614,503
Overall Debt:	$3,455,664,503
Clark County, Nevada Debt Ratios:	
Gross Direct Debt to Taxable-Value:[2]	1.21%
Gross Direct Debt Per Capita[3]	$1,600
Overall Debt to Taxable-Value:[2]	1.13%
Overall Debt Per Capita[3]	$1,489

Debt Retirement
100% of net direct tax-supported debt is paid off within 6 years.

[1] As of June 30, 2022
[2] Based upon FY2021-22 Taxable Value - $306,134,854,263
[3] Based on FY2021-22 population estimate of 2,320,107

SOURCE: Clark County Department of Finance and Nevada Department of Taxation.

In addition to showing the relative position of Clark County, these ratios indicate the significant impact of overlapping debt (See the table entitled "OVERLAPPING NET GENERAL OBLIGATION INDEBTEDNESS") on the County's overall debt position. As can be seen in the calculation of overlapping debt shown earlier, overlapping jurisdictions include the State, the Clark County School District and incorporated cities over which the County has little control. Nonetheless, the debt issuance of these governments directly impacts the overall net direct tax supported debt position of the County.

GROSS DIRECT DEBT SERVICE REQUIREMENTS
Clark County, Nevada
June 30, 2022

Fiscal Year Ending June 30,	Principal	Interest	Grand Total
2023	$ 124,785,038	$ 158,028,378	$ 282,813,416

APPENDIX A

CLARK COUNTY, NEVADA
DEVELOPER SPECIAL IMPROVEMENT DISTRICT GUIDELINES

Under chapter 271 of Nevada Revised Statutes (NRS), the County is authorized to acquire street, sidewalk, water, sewer, curb, gutter, flood control and other publicly-owned "infrastructure" improvements that benefit new development by the creation of a special improvement district as specified in NRS 271.265. The purpose of these guidelines is to outline the circumstances under which the County will consider this type of financing for improvements for new developments involving one or a small number of private property owners who intend on developing their property for residential, commercial, industrial or other beneficial use.

Except as provided in the following two sentences, these guidelines apply to all assessment districts financed under NRS 271.710 through 271.730 and to all other assessment districts in which all three of the following conditions are met: (1) 5 or fewer property owners own 85% or more of the property to be assessed, (2) 80% or more of the property to be assessed is unimproved and (3) the value of any parcel to be assessed "as is" (without considering the improvements to be installed or further subdivision), as shown in the records of the County Assessor or by an appraisal acceptable to the County, is less than three times the amount of the proposed assessment. These guidelines do not apply: (a) if 50% or more of the cost of the project proposed to be funded is being funded from a governmental source other than special assessments or the proceeds of special assessment bonds (e.g., RTC); or (b) if the district is initiated by the provisional order method on recommendation of the Director of Public Works after consultation with the Department of Finance. These guidelines also do not apply to districts that were initiated by action of the Board of County Commissioners prior to the adoption of these guidelines.

The County Commission reserves the right, on a case-by-case basis, to impose additional requirements or waive specific requirements listed herein. Such waived requirements shall be noted in the approval of any petition together with a finding that the deviation from this policy is in the best interest of the County. Additional requirements shall be noted in the approval.

The County will consider the impact of issuing bonds under these guidelines on its overall tax supported debt ratios and bond ratings.

A. Eligible Improvements

1. Regional Improvements: The County will consider financing only regional infrastructure improvements i.e., regional improvements are those streets, storm drains, water systems, sewer and other utilities, which will provide benefit to the entire new development project. Such improvements are those with respect to which the County Commission has made a finding of regional benefit that benefit the general area in which the development is located as opposed to improvements that exclusively benefit a particular subdivision. (Only the portion of the total cost that benefits the special improvement district will be assessed). Thus, only streets or highways which are collector roadways or greater, as defined in the Clark County Transportation Element adopted July 16, 2003, or major sewer, storm drain and/or water lines which provide benefit to the entire project and are found to be of regional benefit by the commission, would be considered for financing. The applicant shall provide a written description of improvements together with a map delineating their location when submitting the Application (Section I.2 of these Guidelines).

2. Public Ownership Requirement: Only publicly owned infrastructure is eligible for financing. Privately-owned improvements such as electric, gas and cable television improvements, streets or roads which are not dedicated to the County and private portions of other improvements, such as water and sewer service lines from the property lines to the home or other structure are not eligible for financing.

3. Benefit: The improvements proposed to be constructed must benefit the property assessed by an amount at least equal to the amount of the assessment. In addition, the property owner must identify to the County the amount of the expected benefit to the property owner (stated in a dollar amount) from using financing provided under these guidelines.

4. Subdivision Improvements: The County will not consider financing "subdivision" or "in-tract" improvements, that is, improvements within a subdivision that benefit only the land within a subdivision such as neighborhood streets.

5. Size: Generally, the County will not consider stand alone assessment districts which involve less than $3,000,000 in bonds.

B. Environment Matters

1. A Phase 1 environmental assessment (hazardous material assessment) on the property to be assessed, property on which the improvements are to be located, and on any property to be dedicated to the County, must be provided by the property owner prior to the bonds being issued by the County. The property owner must also provide the County with an indemnification agreement in a form acceptable to the County, promising to indemnify the County against any and all liability and/or costs associated with any environmental hazards located on property assessed with respect to hazards that existed at the time the developer owned the property. With respect to abating environmental hazards that are located on property on which improvements are financed within the proposed assessment district or on any property dedicated to the County, the County and the property owner will reach an accord before the bonds are issued. Where the Phase 1 assessment indicates that there may be an environmental hazard on any of the assessed property, property on which improvements are to be financed are located, or on any property that is to be dedicated to the County, the property owner will be required to abate the problem or to post security for environmental cleanup costs prior to the County proceeding with the district. An environmental engineer acceptable to the County shall perform the environmental assessment.

2. The developer must undertake all steps required by the "Habitat Conservation Plan Compliance Report" or other future federal requirements in the project area and other areas owned by the same developer that are used in connection with the project.

C. Development

1. Property Owner Experience: The property owner must demonstrate to the County that it has the expertise to complete the new development that the assessment district will support. In order to demonstrate its ability to develop, the property owner should furnish the County with the following: (a) its last three years prior audited financial statements (audit to be performed by a CPA firm acceptable to the County), (b) a list of prior development of similar or larger size which the property owner has completed, (c) a list of references consisting of the names of officials of other political subdivisions in which the property owner has completed similar or larger size developments and (d) a description of any financial obligations on which the

property owner or a related party has defaulted in the past ten (10) years, including any non-recourse or assessment financing on property owned by the property owner or a related party with respect to which a payment was not timely made. The County will accept, in place of financial statements stated in (a) above, a comfort letter from a mutually acceptable CPA firm indicating that for the past three (3) years: (1) that a minimum level of net worth, acceptable to the County, has been maintained; (2) whether or not there have been any material adverse changes in operations; and, (3) whether or not there have been any exceptions in the accountant's opinion letter on the property owner's financial statements. If this alternative is utilized, the property owner shall also provide such other financial information as the County and its consultant's request.

2. Financing Completion: Equity The property owner must provide the County with its plan for financing the new development to completion and advise the County of the amount of equity it has invested in the proposed development. Before bonds are issued the property owner must provide evidence of its ability (e.g., a commitment letter from a lending institution acceptable to the County) and/or plan to finance the portion of the development expected to be completed in the ensuing 12 months.

3. Land Use: The proposed development must be consistent with the County's Comprehensive Plan. Proper zoning or other required land use approval must be in place for the development. The property owner must demonstrate that it reasonably expects to obtain the required development permits (e.g. subdivision recording and building permits) in sufficient time to proceed with the development to completion as proposed.

4. Water, Sewer and Other Utilities: The property owner must provide letters from each entity that will provide utility (e.g., electricity, gas, telephone) services to the development, stating that capacity is then in existence or otherwise to be made available, for the portions of the development to be assessed, in a sufficient quantity for the development to proceed to completion as proposed. Property owner must provide its plan for obtaining water and sewer for the new development.

5. Other Permits: The property owner must demonstrate that there are no significant permitting requirements (i.e. permitting requirements which could result in substantial delay or alteration in the project as proposed, e.g., wetlands permits, archeological permits, etc.) applicable to the project or other governmental impediments to development which have not yet been satisfied and which are required to be satisfied for the development to proceed to completion as proposed.

6. Absorption Study: The property owner must provide the County with funds with which to have an absorption study prepared by a recognized expert in the field. The County shall select and contract with the expert to prepare the study illustrating the economic feasibility of the new development based upon supply and demand trends and estimated conditions in the market area for the proposed product mix. If the appraiser of the real property for the project conducts his or her own absorption analysis and provides an opinion to its reasonable, the County may accept the absorption study in lieu of this requirement. The appraiser may be required to provide an opinion on the reasonableness of the absorption analysis if it is included as part of the report.

D. Assessment Bonds and Bond Security

1. Primary Security: The primary security for bonds will be the assessment lien on the land proposed to be assessed. A preliminary title report indicating that the petitioners are the

owners of all of the assessed property must accompany the petition. The County may also require ALTA title insurance policy in the amount equal to the bonds in appropriate situations.

2. Reserve Fund: A reserve fund in an amount equal to the lesser of one year's principal and interest on the bonds or 10% of the proceeds of the bonds must be funded at the time bonds are issued.

3. Appraisal Valuation: The property owner must provide the County with funds for an appraisal of the property which will be assessed which in the case of the appraised value of each parcel to be assessed "as is" (prior to further subdivision and without considering the installation of the improvements) is at least equal to 1.15 times the proposed amount of the assessment against that parcel and that the value of each parcel to be assessed after the improvements financed with the assessment bonds are installed is at least three (3) times the amount of the proposed amount of the assessment against that parcel. The appraiser will be selected by, and contract with, the County.

4. Additional Security: The property owner must demonstrate to the County that there is not significant financial risk to the County in issuing the bonds. Credit enhancement will be required if, after review by the County or consultant(s) hired by the County, it is determined that security for payment(s) of the assessments is insufficient. The applicant will be responsible for payment to consultant(s) hired by the County for this purpose. Credit enhancements may take the form of cash, letters of credit, surety bonds, insurance policies, or other collateral. The County shall determine the form of the credit enhancement. Credit enhancement from a provider with a rating less than A- are not acceptable.

   A pro-rata portion of the foregoing additional security will be released with respect to any parcel assessed (1) which has been improved in any manner if the appraised value (as determined by an appraiser acceptable to the County) of the parcel is 5.0 or more times the amount of the unpaid assessment on such parcel, (2) on which a substantial improvement (e.g., a home or commercial building) has been completed if the parcel has a size of one acre or less, or (3) which is subdivided by a final recorded subdivision map to its final configuration of developable lots and for which all required infrastructure (water, sewer, streets, other utilities) has been installed or bonded in accordance with the Clark County Code.

5. Payment of Assessments: Capitalized Interest: The assessments shall be payable over not more than 30 years in substantially equal semiannual installments (excluding variable rate bonds with regard to equal payments) commencing within one year of the levy of assessments; provided that if capitalized interest is approved, the payments during the capitalized interest period may be interest only, and may amortize only that amount of principal as the County requires. If the County approves capitalized interest, it will allow not more than two years of interest or the maximum permitted under federal tax laws, whichever is less, to be capitalized.

6. Floating Rate Bonds: The County will consider applications for floating rate assessment bonds only if those bonds and the assessments underlying those bonds automatically convert to a fixed interest rate at or before the time the initial property owner sells property, regardless of whether the sale is wholesale sale to a merchant builder or a developer or a sale to a potential homeowner. Floating rate bonds must be secured by a letter of credit issued by a bank acceptable to the County.

7. No Pledge of Surplus and Deficiency Fund, General Fund or Taxing Power: The County will not pledge its Surplus and Deficiency Fund, General Fund or taxing power to bonds.

8. Bond Underwriting Commitment: The property owner must demonstrate to the County and its municipal advisor that bonds proposed to be issued for the financing are saleable. The property owner must provide the County with a letter, accompanying the application, from a reputable underwriter or bond buyer approved by the County, which states that the underwriter has completed a due diligence review of the project and the underwriter believes that the bonds are marketable at an interest rate acceptable to the property owner based on then prevailing market conditions and that it is willing, subject to reasonable conditions precedent, to contract with the County to underwrite the bonds on a best efforts basis, or that the bond buyer has completed a due diligence review of the project and the property owner and intends to acquire the bonds at an interest rate which the bond buyer and property owner agree is acceptable and that it is willing, to contract with the County to so acquire the bonds.

E. Consultants The County will permit the property owner to choose the consulting engineers (from the County's list of approved firms) and underwriter (with the County's approval) provided that the entities chosen are acceptable to the County. The counsel for the underwriters may be selected by the underwriters after consultation with an opportunity to comment by the County. Underwriter's counsel's opinion must include the County as an addressee. The County will select the assessment engineer and project management engineer after receiving comments on its proposed selection from the developer. The County also will select its financial consultants, bond counsel and bond trustee. The payment of all fees and expenses of these consultants shall be the responsibility of the property owner; however, these consultants will be responsible to and will act as consultants to and on behalf of the County in connection with the district.

F. Expenses The property owner will be required to pay from its funds, all of the costs of the project prior to the time bonds are issued, including the costs of consulting engineers, assessment engineers, project management engineers, underwriters, the County's financial consultant, the County's bond counsel, County direct staff time set by an hourly rate or by formula, the cost of preparing the appraisals, absorption study, environmental review and other matters listed above. These items will be eligible for reimbursement from bond proceeds if the bonds are ultimately issued; however, the property owner must agree to pay these costs even if bonds are not issued. At the time of application, the County will provide an estimate for these expenses in order to enable the developer to more precisely anticipate costs associated with the process.

G. Project Acquisition

1. The County intends to acquire completed improvements only after final inspection by the County, an audit by the County assessment engineer and County staff and acceptance by the County.

2. The County intends to accept for maintenance responsibility only completed improvements (i.e., there are no further subprojects to complete within the same right-of-way). A completed improvement may be comprised of multiple subprojects. The County may make payments to the developer for individual subprojects as they are completed. However, the County will not accept maintenance responsibility on the completed improvements until after final inspection by the County, an audit by the County assessment engineer and County staff, and acceptance by the County. Guarantee bonds, guaranteeing workmanship and materials; and payment and performance bonds or cash deposits may be required, as determined by the Department of Finance, Department of Public Works, and the County Counsel.

H. Cost Overruns - The property owner must agree to fund and/or provide payment and performance bonds, as required by the County, for all project costs that exceed the amount available from the proceeds of the bonds issued for the project. The County will not commit to issue additional bonds or otherwise provide funding for any such cost overruns.

I. Procedure

1. Pre-Application Meeting: Initially, the property owner shall schedule a meeting with representatives of the Department of Finance and the Department of Public Works to review the proposed improvement project to discuss whether the improvement project is one which may be eligible for financing under these guidelines.

2. Application: If the property owner decides to proceed after the initial meeting, all owners of record of property in the proposed district must sign a petition requesting that the district be formed and file the petition and an application which contains sufficient information and exhibits to demonstrate that the proposed district will comply with parts A-H of these guidelines. (All persons who hold a lien or encumbrance against the property as of the date of presentation of the petition must sign the petition or a certificate acknowledging that they had received a copy of the petition.) A preliminary title report prepared by a title insurance company licensed in the state that shows the ownership of the property and liens and encumbrances against the property must accompany the petition. Copies of the petition and application must be filed with the office of the Chief Financial Officer and the office of the Director of Public Works.

3. Commission Approval: If, after an initial review, the County staff believes the application satisfies parts A-H hereof, an item will be placed on the Commission's agenda authorizing negotiations with respect to the proposed improvement project. If the Commission approves this item, it is anticipated that staff will be authorized to begin negotiating the particulars of the financing with the property owner and other appropriate parties. Prior to Commission approval, a developer will submit to the Department of Public Works, plans and specifications that are sufficiently specific to allow a competent contractor with the assistance of a competent engineer to estimate the cost of constructing the projects within the district and to construct the projects. Additional detail may be required to make this determination.

4. Security for Costs: Prior to entering negotiations, the property owner must post a letter of credit, surety bond, cash or other acceptable form of security for payment of the costs described in F above in an amount and in a form approved by the Chief Financial Officer. The interest earned on the security will be paid to the developer. The County shall invest such security according to NRS 355 and 356.

APPENDIX B

OTHER LOCAL GOVERNMENT DEBT INFORMATION

Appendix B contains debt information for local governments for which the Board of Clark County Commissioners sits as the governing body. These local governmental organizations do not prepare a separate debt management policy.

APPENDIX C

CLARK COUNTY GENERAL OBLIGATION BOND RATING REPORTS
FROM MOODY'S INVESTORS SERVICE AND STANDARD AND POOR'S

MOODY'S
INVESTORS SERVICE

Rating Action: Moody's assigns Aa1 to Clark County, NV's 2022 Bond Bank Refunding GOLT; outlook stable

14 Apr 2022

New York, April 14, 2022 -- Moody's Investors Service has assigned a Aa1 rating to Clark County, Nevada's General Obligation (Limited Tax) Bond Bank Refunding Bonds (Additionally Secured by SNWA Pledged Revenues), Series 2022 in the expected amount of $75.3 million. Moody's maintains Aa1 ratings on the county at the issuer level and on its outstanding GOLT debt. Post-issuance the county will have $3.74 billion in outstanding debt. The outlook is stable.

RATINGS RATIONALE

The Aa1 rating reflects the county's strong management team and robust balance sheet that continue to support managing through lingering economic and financial uncertainty from the coronavirus pandemic. While the county's tourism and gaming-driven economy took a large hit throughout the pandemic, recent activity has begun to approach pre-pandemic levels and will drive economic recovery. The county's exceptionally large and growing tax base will continue to be a steadying credit factor, and we anticipate growth to continue for the foreseeable future. The county's reserve position is healthy and, though we anticipate some expenditure pressures in the near-term given deferral of expenses during the pandemic, we anticipate that the county's conservative budget management and better than anticipated revenue environment will produce strong fiscal results. Debt is manageable however pension liabilities are elevated and likely to grow.

The absence of a rating distinction between the county's issuer and GOLT ratings reflects the strength of the full faith and credit pledge in Nevada, which Moody's rates at the same level as the issuer ratings of local governments in the state.

RATING OUTLOOK

The stable outlook reflects our expectation that the county will continue to maintain a strong financial profile driven by a strong and experienced management team with conservative budget and management practices. The stable outlook also reflects our belief that the Las Vegas (Aa2 stable) area economy will continue recovering from pandemic-driven declines.

FACTORS THAT COULD LEAD TO AN UPGRADE OF THE RATING

Substantial diversification of the county's economy

Growth of reserves exceeding that of Aa1 peers

FACTORS THAT COULD LEAD TO A DOWNGRADE OF THE RATING

Significant economic contraction

Change in consumer behavior away from gaming and conventions

Need to use GO backstop for previously self-supporting debt

LEGAL SECURITY

The bonds are secured by the full faith and credit pledge of the county, subject to Nevada's constitutional and statutory limitations on overlapping levy rates for ad valorem taxes. The bonds are additionally secured by the net revenues and unrestricted cash resources of the Southern Nevada Water Authority (SNWA), which are the expected source of repayment.

USE OF PROCEEDS

Proceeds from the Series 2022 bonds will be used to refund the county's outstanding Series 2012 GOLT Bond Bank Bonds for net present value savings with no extension of debt service payments.

PROFILE

Clark County is located in southern Nevada (Aa1 stable) and includes Las Vegas as well as the surrounding metro area. The county is the economic center of the state, and its 2.3 million residents represent almost three-quarters of the state's population.

METHODOLOGY

The principal methodology used in this rating was US Local Government General Obligation Debt published in January 2021 and available at https://www.moodys.com/researchdocumentcontentpage.aspx?docid=PBM_1260094. Alternatively, please see the Rating Methodologies page on www.moodys.com for a copy of this methodology.

REGULATORY DISCLOSURES

For further specification of Moody's key rating assumptions and sensitivity analysis, see the sections Methodology Assumptions and Sensitivity to Assumptions in the disclosure form. Moody's Rating Symbols and Definitions can be found at: https://www.moodys.com/researchdocumentcontentpage.aspx?docid=PBC_79004.

For ratings issued on a program, series, category/class of debt or security this announcement provides certain regulatory disclosures in relation to each rating of a subsequently issued bond or note of the same series, category/class of debt, security or pursuant to a program for which the ratings are derived exclusively from existing ratings in accordance with Moody's rating practices. For ratings issued on a support provider, this announcement provides certain regulatory disclosures in relation to the credit rating action on the support provider and in relation to each particular credit rating action for securities that derive their credit ratings from the support provider's credit rating. For provisional ratings, this announcement provides certain regulatory disclosures in relation to the provisional rating assigned, and in relation to a definitive rating that may be assigned subsequent to the final issuance of the debt, in each case where the transaction structure and terms have not changed prior to the assignment of the definitive rating in a manner that would have affected the rating. For further information please see the ratings tab on the issuer/entity page for the respective issuer on www.moodys.com.

The rating has been disclosed to the rated entity or its designated agent(s) and issued with no amendment resulting from that disclosure.

This rating is solicited. Please refer to Moody's Policy for Designating and Assigning Unsolicited Credit Ratings available on its website www.moodys.com.

Regulatory disclosures contained in this press release apply to the credit rating and, if applicable, the related rating outlook or rating review.

Moody's general principles for assessing environmental, social and governance (ESG) risks in our credit analysis can be found at http://www.moodys.com/researchdocumentcontentpage.aspx?docid=PBC_1288235 .

The Global Scale Credit Rating on this Credit Rating Announcement was issued by one of Moody's affiliates outside the EU and is endorsed by Moody's Deutschland GmbH, An der Welle 5, Frankfurt am Main 60322, Germany, in accordance with Art.4 paragraph 3 of the Regulation (EC) No 1060/2009 on Credit Rating Agencies. Further information on the EU endorsement status and on the Moody's office that issued the credit rating is available on www.moodys.com.

The Global Scale Credit Rating on this Credit Rating Announcement was issued by one of Moody's affiliates outside the UK and is endorsed by Moody's Investors Service Limited, One Canada Square, Canary Wharf, London E14 5FA under the law applicable to credit rating agencies in the UK. Further information on the UK endorsement status and on the Moody's office that issued the credit rating is available on www.moodys.com.

Please see www.moodys.com for any updates on changes to the lead rating analyst and to the Moody's legal entity that has issued the rating.

Please see the ratings tab on the issuer/entity page on www.moodys.com for additional regulatory disclosures for each credit rating.

MOODY'S adopts all necessary measures so that the information it uses in assigning a credit rating is of sufficient quality and from sources MOODY'S considers to be reliable including, when appropriate, independent third-party sources. However, MOODY'S is not an auditor and cannot in every instance independently verify or validate information received in the rating process or in preparing its Publications.

To the extent permitted by law, MOODY'S and its directors, officers, employees, agents, representatives, licensors and suppliers disclaim liability to any person or entity for any indirect, special, consequential, or incidental losses or damages whatsoever arising from or in connection with the information contained herein or the use of or inability to use any such information, even if MOODY'S or any of its directors, officers, employees, agents, representatives, licensors or suppliers is advised in advance of the possibility of such losses or damages, including but not limited to: (a) any loss of present or prospective profits or (b) any loss or damage arising where the relevant financial instrument is not the subject of a particular credit rating assigned by MOODY'S.

To the extent permitted by law, MOODY'S and its directors, officers, employees, agents, representatives, licensors and suppliers disclaim liability for any direct or compensatory losses or damages caused to any person or entity, including but not limited to by any negligence (but excluding fraud, willful misconduct or any other type of liability that, for the avoidance of doubt, by law cannot be excluded) on the part of, or any contingency within or beyond the control of, MOODY'S or any of its directors, officers, employees, agents, representatives, licensors or suppliers, arising from or in connection with the information contained herein or the use of or inability to use any such information.

NO WARRANTY, EXPRESS OR IMPLIED, AS TO THE ACCURACY, TIMELINESS, COMPLETENESS, MERCHANTABILITY OR FITNESS FOR ANY PARTICULAR PURPOSE OF ANY CREDIT RATING, ASSESSMENT, OTHER OPINION OR INFORMATION IS GIVEN OR MADE BY MOODY'S IN ANY FORM OR MANNER WHATSOEVER.

Moody's Investors Service, Inc., a wholly-owned credit rating agency subsidiary of Moody's Corporation ("MCO"), hereby discloses that most issuers of debt securities (including corporate and municipal bonds, debentures, notes and commercial paper) and preferred stock rated by Moody's Investors Service, Inc. have, prior to assignment of any credit rating, agreed to pay to Moody's Investors Service, Inc. for credit ratings opinions and services rendered by it fees ranging from $1,000 to approximately $5,000,000. MCO and Moody's Investors Service also maintain policies and procedures to address the independence of Moody's Investors Service credit ratings and credit rating processes. Information regarding certain affiliations that may exist between directors of MCO and rated entities, and between entities who hold credit ratings from Moody's Investors Service and have also publicly reported to the SEC an ownership interest in MCO of more than 5%, is posted annually at www.moodys.com under the heading "Investor Relations — Corporate Governance — Director and Shareholder Affiliation Policy."

Additional terms for Australia only: Any publication into Australia of this document is pursuant to the Australian Financial Services License of MOODY'S affiliate, Moody's Investors Service Pty Limited ABN 61 003 399 657AFSL 336969 and/or Moody's Analytics Australia Pty Ltd ABN 94 105 136 972 AFSL 383569 (as applicable). This document is intended to be provided only to "wholesale clients" within the meaning of section

761G of the Corporations Act 2001. By continuing to access this document from within Australia, you represent to MOODY'S that you are, or are accessing the document as a representative of, a "wholesale client" and that neither you nor the entity you represent will directly or indirectly disseminate this document or its contents to "retail clients" within the meaning of section 761G of the Corporations Act 2001. MOODY'S credit rating is an opinion as to the creditworthiness of a debt obligation of the issuer, not on the equity securities of the issuer or any form of security that is available to retail investors.

Additional terms for Japan only: Moody's Japan K.K. ("MJKK") is a wholly-owned credit rating agency subsidiary of Moody's Group Japan G.K., which is wholly-owned by Moody's Overseas Holdings Inc., a wholly-owned subsidiary of MCO. Moody's SF Japan K.K. ("MSFJ") is a wholly-owned credit rating agency subsidiary of MJKK. MSFJ is not a Nationally Recognized Statistical Rating Organization ("NRSRO"). Therefore, credit ratings assigned by MSFJ are Non-NRSRO Credit Ratings. Non-NRSRO Credit Ratings are assigned by an entity that is not a NRSRO and, consequently, the rated obligation will not qualify for certain types of treatment under U.S. laws. MJKK and MSFJ are credit rating agencies registered with the Japan Financial Services Agency and their registration numbers are FSA Commissioner (Ratings) No. 2 and 3 respectively.

MJKK or MSFJ (as applicable) hereby disclose that most issuers of debt securities (including corporate and municipal bonds, debentures, notes and commercial paper) and preferred stock rated by MJKK or MSFJ (as applicable) have, prior to assignment of any credit rating, agreed to pay to MJKK or MSFJ (as applicable) for credit ratings opinions and services rendered by it fees ranging from JPY100,000 to approximately JPY550,000,000.

MJKK and MSFJ also maintain policies and procedures to address Japanese regulatory requirements.

Long Term Rating	AA+/Stable	Affirmed

Rating Action

S&P Global Ratings assigned its 'AA+' long-term rating to Clark County, Nev.'s anticipated $75.3 million series 2022 general obligation (GO) limited-tax bond bank refunding bonds. S&P Global Ratings also affirmed its 'AA+/A-1+' rating on the county's series 2008A limited-tax GO airport bonds outstanding and its 'AA+' long-term and underlying ratings (SPURs) on the existing GO debt. The outlook on all ratings is stable.

The series 2022 bonds GO bond bank refunding bonds, as well as the county's GO bonds outstanding, are secured by the county's full-faith-and-credit property-tax pledge, subject to a statutory limit on overlapping debt of $3.64 per $100 of assessed value (AV). The series 2022 GO bonds are also additionally secured by pledged revenues that comprise a portion of the net water revenues generated by the Southern Nevada Water Authority (SNWA). The 'AA+' rating on the series 2022 bonds reflects the general creditworthiness of the county's full-faith-and-credit pledge, which we view as having stronger credit quality. The 'A-1+' short-term component of the series 2008A bond rating is based on a standby bond purchase agreement (SBPA) provided by State Street Bank and Trust. The series 2022 bond proceeds will be used to refund the county's existing GO bond bank bonds.

Credit overview

Following our last review in September 2021, when we revised our outlook on Clark County to stable from negative, the county's financial performance has continued to track in line with our expectations. The pandemic caused a significant slowdown in the local economy, as Clark County is home to almost 75% of all Nevada residents and includes Las Vegas, a gaming and entertainment tourism center. With a rebound in tourism and unemployment rates trending to pre-pandemic levels, this indicates a strengthening of the local economy.

Through conservative budgeting and better-than-expected consolidated tax revenue, the county weathered the decline in tourist activity with positive operating results in fiscal 2021. We believe that the trajectory forward is still somewhat uncertain, given the potential for additional variants of COVID-19 that could have an impact on tourism. While

consolidated taxes and local sales tax revenues have grown over the past two years and represent almost 50% of the county's revenue stream, we believe that consumer spending is expected to slow considerably in 2022, given higher prices and lower purchasing power. Given the strong financial management, we expect the county will continue to exhibit strong budgetary performance while maintaining strong reserve levels. The county's debt profile is strong compared with peers, although we recognize that the pension plan that the county participates in is relatively underfunded, and we believe this could lead to potentially significant cost increases in the future, thus potentially pressuring the rating beyond our outlook period. We do not expect to change the rating over the two-year outlook period.

The rating reflects our view of the county's:

- Continued solid economic recovery and role as an anchor for the Las Vegas-Henderson-Paradise, NV metropolitan statistical area (MSA);
- Prudent and experienced management team, with well-embedded financial policies and practices and a strong institutional framework;
- Stable finances through the pandemic despite reliance on potentially volatile revenues, as evident in operating surpluses in fiscal years 2020 and 2021, further bolstering already strong operating reserves; and
- Favorable debt ratios relative to similarly rated peers, though with a large, but improving, overall pension and other postemployment benefits (OPEB) obligation funded ratio and carrying charges.

Environmental, social, and governance

We analyzed the county's environmental, social, and governance (ESG) risks relative to its economy, management, financial measures, and debt and liability profile. We view governance risks as neutral in our credit rating analysis. Our ratings incorporate our view of the health and safety social risks posed by the COVID-19 pandemic and how variants continue to affect the visitor and leisure industry that represents a substantial part of the county's local economy. Though the ongoing pandemic has reduced tourism demand compared with previous years, we note the county's improved economic activity starting in summer 2021 has shown stability as vaccination rates improve, leading to recovery in travel demand and decreased limitations on social distancing.

We view the county's environmental risk as elevated due to the area's susceptibility to drought conditions and extreme heat, which together increase the risk of wildfires. Currently, the U.S. Drought Monitor (a federal interagency initiative) shows much of the county as experiencing extreme or severe drought. We are monitoring whether the potential for drought conditions and other physical climate risks will become more frequent and prolonged because of climate change, which could negatively affect long-term economic growth, particularly given the robust demographic trends in the region. Importantly, we believe SNWA's detailed water resource plan, which identifies infrastructure improvements and conservation plans, as well as permanent, temporary, and future resources to address their water demand, is helping to manage water scarcity. While extreme heat may be a longer-term risk, it could reduce productivity and potentially lead to dampening demand in tourism should it become undesirable to visit the region. For more information on how we believe drought conditions could affect municipal credits across the western United States, see "Could The Western U.S. Drought Threaten Municipal Credit Stability?," published Aug. 18, 2021, on RatingsDirect, and "ESG U.S. Public Finance Report Card: Mountain States," published March 17, 2022.

Stable Outlook

Upside scenario

All else equal, the rating could be raised if the county's local economy fully recovers, reflecting lower unemployment rates along with a restoration of pre-pandemic visitor volume to the county, including business travel and convention events. An improvement in wealth and income metrics and diversification of the economic base to insulate from down cycles would also be viewed positively.

Downside scenario

Should a deterioration in the local economy result in a significant decline in reserves from their currently very strong levels, we could lower the rating.

Credit Opinion

Economy showing signs of improvement despite pandemic impact on tourism

Clark County, with an estimated population of 2.3 million, covers more than 8,000 square miles in southern Nevada within the Las Vegas-Henderson-Paradise, Nev. MSA, which we consider to be broad and diverse. Several of the state's largest cities, such as Las Vegas and Henderson, are within county boundaries.

The county's local economy continues to have a heavy reliance on the region's leisure and hospitality industries, and economic indicators such as room rates, visitor volume, passenger counts, and gaming revenue remain critical to the county's economy. The local economy has begun to reflect a steady recovery from fiscal 2020, due in part to both the reopening of gaming casinos and other retail businesses within the county as well as the widespread availability of the COVID-19 vaccine. Management reports that visitor volume has been increasing, and notes that as of February 2022 volumes are at 79% of pre-pandemic levels, despite the decrease in international travel. We believe the increase in visitor volume reflects a recovery in the county's local economy that is likely to continue, but inflationary pressures could have an impact on consumers' discretionary spending on travel.

The county's AV reflects strong growth in fiscal 2022 due to the completion of major capital projects within the county (including the Raiders Stadium, Wynn Convention Center, and the Caesars Forum Conference Center). Management indicates that property development remains strong within the county, and they expect AV to continue to increase for the next several years.

During 2020 and 2021, the local economy was severely affected by the COVID-19 pandemic, with county unemployment rates sharply rising to its highest 33% in April 2020 and persisting at elevated levels into 2021. The current unemployment rate has moderated to 5.3% as of February 2022, and with significantly rising vaccination rates, we believe that the unemployment rate will commensurately decline; by comparison, S&P Global Economics forecasts that the national unemployment rate will return to pre-pandemic levels by the second quarter of 2022.

Very strong management with strong financial policies and practices

Key policies and practices include:

- Expenditure forecasts that rely on a continuation of historic trends, including approximately 5% annual growth in labor costs;
- A reserve policy that mandates a minimum of 8.3% of expenditures, though it prefers to keep reserves in excess of the 10% target, to which it has adhered historically;
- A five-year operational forecast and capital plan, updated annually, that integrates the capital plan into the operating budget;
- A formal debt management plan that includes debt and derivative use and, as is required of local governments in Nevada, a debt service fund with reserves equal to one-years' worth of principal and interest; and
- A formal investment policy with monthly reporting on cash, investments, and holdings reported to the county board and an annual assessment of the policy.

Despite pandemic challenges, continued budgetary surpluses during the past three years with results outperforming estimates, and maintenance of very strong reserves

The county's budgetary performance is strong, reflecting a trend of positive general fund operating results. These results have allowed the county to establish a strong reserve and liquidity position. Fiscal 2021 operating results beat expectations with a surplus and without the use of reserves. Management attributes the positive performance to adjustments in expenditures to account for the decline in revenues. We note that the county received $220 million in coronavirus state and local fiscal recovery funds under the American Rescue Plan Act (ARPA), but these funds are not included in the general fund and/or our reserve calculations. Expectations for fiscal 2022 include a surplus and no draw on reserves.

Both consolidated taxes and property tax revenues increased in fiscal 2021 with an expectation of continued growth going into fiscal 2022, as reflected in the county's budget. Despite the pandemic and the previous economic recession, we note that property tax revenues, which comprise about 34% of 2021 general fund revenues, have not declined since 2014, reflecting the strength of the county's taxing base. Consolidated taxes fell in fiscal 2020 due to the statewide closure of gaming facilities and commercial retail businesses, but have seen an increase in fiscal years 2021 and 2022. Tourism-related revenues, such as room tax and gaming license fees, continue to recover and management projects that these revenues are expected to grow in fiscal 2022, although budgeted levels are still well below pre-pandemic levels.

The tentative budget for fiscal 2023 is structurally balanced and includes conservative assumptions, according to county management. With our expectation for continued strong budgetary performance, we expect the county's available reserves and liquidity will remain very strong over the outlook period.

Strong debt and contingent liability profile with low overall net debt

The county's debt profile includes $773 million in variable-rate debt (10% of total direct debt); however, we do not believe the debt is a significant liquidity risk. We note that most of the county's variable-rate debt is enterprise debt. Our calculation of net direct debt excludes self-supporting revenue obligations. Additionally, much of the county's debt profile includes GO bonds supported by non-ad valorem revenue. We note the county's debt portfolio also includes fixed-rate, directly placed GO bonds. We understand there are no provisions in the bonds' agreements that permit acceleration or payment prioritization to holders of the direct-purchase debt. The county does not have additional debt

plans.

Pension and OPEB costs not an immediate budgetary pressure, but funding progress is slow

We do not view pension and OPEB liabilities as an immediate source of credit pressure for the county. The pension plan that the county participates in is relatively underfunded, partially due to the lowering of the discount rate in 2017, and we believe this could lead to potentially significant cost increases in the future.

Clark County contributes to the Public Employees Retirement System (PERS) of the state of Nevada, a cost-sharing, multiple-employer, noncontributory, defined-benefit public employee retirement plan administered by PERS. As of June 30, 2021, the PERS plan is funded at an estimated 86.5% with the county's proportionate share of the net pension liability at an estimated $1.97 billion, per the plan in the 2021 actuarial report.

We note that related entities, the expenditures of which are not accounted for as part of the county's governmental expenditures, fund a portion of the pension contributions. Clark County and its component units provide OPEB to retirees through seven benefit plans, and the county addresses these OPEB costs through pay-as-you-go financing. We understand that the county established a separate trust fund in fiscal 2014. Although we consider the county's overall pension and OPEB obligation relatively large, the funded ratio and carrying charges have improved in recent years, largely due to the state increasing contribution rates and the county overfunding OPEB through a separate trust.

Strong institutional framework

The institutional framework score for Nevada counties is strong.

APPENDIX E

Clark County, Nevada
INTEREST RATE SWAP POLICY
June 30, 2022

1. Introduction

The purpose of this policy (the "Policy") is to establish guidelines for the execution and management of Clark County's (the "County") use of interest rate swaps or similar products ("Swap Products") and related transactions to meet the financial and management objectives as outlined herein.

This policy confirms the commitment of County management to adhere to sound financial and risk management policies.

2. Scope

The County recognizes that Swap Products can be appropriate financial management tools to achieve the County's financial and management objectives. This Policy sets forth the manner in which the County shall enter into transactions involving Swap Products. The County shall integrate Swap Products into its overall debt and investment management programs in a prudent manner in accordance with the parameters set forth in this Policy.

This Policy applies to any interest rate swap; swap option or related transaction that the County may undertake.

3. Authorizations and Approvals; Compliance with Bond Documents and Covenants

The County shall obtain the approval of the Clark County Board of County Commissioners (the "BOCC") prior to entering into any interest rate swap, swap option or related transaction. The County, in consultation with its Bond Counsel, and municipal advisors will determine whether a proposed swap agreement complies with State law and any other applicable law and any other applicable provisions of the County's bond resolutions and agreements with respect to its outstanding debt.

4. General Objectives

The County may execute an interest rate swap, swap option or related transaction to the extent the transaction can be reasonably expected to achieve one or more of the following objectives:

- Result in a lower net cost of borrowing with respect to the County's debt, or achieve a higher net rate of return on the investment of County moneys.

- Reduce exposure to changes in interest rates either in connection with a particular debt financing or investment transaction or in the management of interest rate risk with respect to the County's overall debt and investment portfolios.

- Enhance financing flexibility for future capital projects.

5. Prohibited Uses of Interest Rate Swaps and Related Instruments

The County shall not execute interest rate swaps agreements or related instruments under the following circumstances:

- When a swap or other financial instrument is used for speculative purposes, such as potential trading gains, rather than for managing and controlling interest rate risk in connection with County debt or investments;

- When a swap or other financial instrument creates extraordinary leverage or financial risk;

- When the County lacks sufficient liquidity to terminate the swap at current market rates; or

- When there is insufficient price "transparency" to permit the County and its municipal advisors to reasonably value the instrument, as a result, for example, of the use of unusual structures or terms.

6. Permitted Financial Instruments

The County may utilize the following financial products, if then permitted by law, on either a current or forward basis, after identifying the objective(s) to be realized and assessing the attendant risks, if permitted by law:

- Interest rate swaps, including fixed, floating and/or basis swaps

- Interest rate caps, floors and collars

- Options, including on swaps, caps, floors and/or collars and/or cancellation or index-based features

7. Identification and Evaluation of Financial and Other Risks

Prior to execution of an interest rate swap, swap option or related transaction, the County and its municipal advisors shall identify and evaluate the financial risks involved in the transaction, and summarize them, along with any measures that will be taken to mitigate those risks. The types of questions that should be evaluated in connection with the identification and evaluation of financial risks shall include:

- Market or Interest Rate Risk: Does the proposed transaction hedge or create exposure to fluctuations in interest rates?

- Tax Law Risk: Is the proposed transaction subject to rate adjustments, extraordinary payments, termination, or other adverse consequences in the event of a future change in Federal income tax policy?

- Termination Risk: Under what circumstances might the proposed transaction be terminated (other than at the option of the County)? At what cost? Does the County have sufficient liquidity to cover this exposure?

- Risk of Uncommitted Funding ("Put" risk): Does the transaction require or anticipate a future financing(s) that is dependent upon third party participation? What commitments can be or have been secured for such participation?

- Legal Authority: Is there any uncertainty regarding the legal authority of any party to participate in the transaction?

- Counterparty Credit Risk: What is the credit-worthiness of the counterparty? What provisions have been made to mitigate exposure to adverse changes in the counterparty credit standing?

- Ratings Risk: Is the proposed transaction consistent with the County's current credit ratings or its desired future ratings and with related rating agency policies?

- Basis Risk: Do the anticipated payments that the County would make or receive match the payments that it seeks to hedge?

- Tax Exemption on County Debt: Does the transaction comply with all Federal tax law requirements with respect to the County's outstanding tax-exempt bonds?

- Accounting Risk: Does the proposed transaction create any accounting issues that could have a material detrimental effect on the County's financial statements? Would the proposed transaction have any material effect on the County's rate covenant calculation or compliance? How are any such effects addressed?

- Administrative Risk: Can the proposed transaction be readily administered and monitored by the County's finance team consistent with the policies outlined in the County's Interest Rate Swap Policy?

- Subsequent Business Conditions: Does the proposed transaction or its benefits depend upon the continuation or realization of specific industry or business conditions?

- Aggregate Risk – to the extent that various Departments of the County or issuing entities of the County also have swap exposures that may aggregate up to the County level (i.e. they are not limited, but involve some sort of pledge by the County itself) the County should include this risk in its overall analysis.

8. Risk Limitations

The total notional amount and term of all Swap Transactions executed by the County shall not exceed the notional amount and term specified from time to time by the County Chief Financial Officer (the "CFO"). It is expected that the County's total variable rate exposure, net of Swap

Transactions which have the economic effect of reducing variable rate exposure, will be established from time to time based upon an evaluation of all relevant factors, including investment allocations, risk tolerance, credit strength, and market conditions.

9. Form of Swap Agreements

Each interest rate swap executed by the County shall contain terms and conditions as set forth in the International Swap and Derivatives Association, Inc. ("ISDA") Master Agreement, including the Schedule to the Master Agreement and a Credit Support Annex, as supplemented and amended in accordance with the recommendations of the County's finance team. The swap agreements between the County and each qualified swap counterparty shall include payment, term, security, collateral, default, remedy, termination, and other terms, conditions and provisions as the County, in consultation with its municipal advisors and Bond Counsel deems necessary or desirable.

10. Qualified Swap Counterparties

The County shall be authorized to enter into interest rate swap transactions only with qualified swap counterparties. At least one of the ratings of the County's counterparties (or their guarantors) must be in the "AA" category, or at least Aa3/Aa- and no lower than A2 or A. In addition, each counterparty must have a demonstrated record of successfully executing swap transactions as well as creating and implementing innovative ideas in the swap market. Each counterparty (or guarantor) shall have a minimum capitalization of at least $250 million.

In order to diversify the County's counterparty credit risk, and to limit the County's credit exposure to any one counterparty, limits will be established for each counterparty based upon both the credit rating of the counterparty as well as the relative level of risk associated with each existing and proposed swap transaction. The guidelines below provide general termination exposure guidelines with respect to whether the County should enter into an additional transaction with an existing counterparty. The County may make exceptions to the guidelines at any time to the extent that the execution of a swap achieves one or more of the goals outlined in these guidelines or provides other benefits to the County. In general, the maximum Net Termination Exposure to any single Counterparty should be set so that it does not exceed a prudent level as measured against the gross revenues, available assets or other financial resources of the County.

Such guidelines will also not mandate or otherwise force automatic termination by the County or the counterparty. Maximum Net Termination Exposure is not intended to impose retroactively any terms and conditions on existing transactions. Such provisions will only act as guidelines in making a determination as to whether or not a proposed transaction should be executed given certain levels of existing and projected net termination exposure to a specific counterparty. Additionally, the guidelines below are not intended to require retroactively additional collateral posting for existing transactions. Collateral posting guidelines are described in the "Collateral Requirements" section below. The calculation of net termination exposure per counterparty will take into consideration multiple transactions, some of which may offset the overall exposure to the County.

Under this approach, the County will set limits on individual counterparty exposure based on existing as well as new or proposed transactions. The sum of the **current market value** and the **projected exposure** shall constitute the Maximum Net Termination Exposure. For outstanding

transactions, current exposure will be based on the market value as of the last quarterly swap valuation report provided by the Municipal Advisor. Projected exposure shall be calculated based on the swap's potential termination value taking into account possible adverse changes in interest rates as implied by historical or projected measures of potential rate changes applied over the remaining term of the swap.

For purposes of this calculation, the County shall include all existing and projected transactions of an individual counterparty and all transactions will be analyzed in aggregate such that the maximum exposure will be additive.

The exposure thresholds, which will be reviewed periodically by the County to ensure that they remain appropriate, will also be tied to credit ratings of the counterparties and whether or not collateral has been posted as shown in the table below. If a counterparty has more than one rating, the lowest rating will govern for purposes of the calculating the level of exposure. A summary table is provided below.

Counterparty Credit Exposure Recommended Limits

Credit Ratings	Maximum Collateralized Exposure	Maximum Uncollateralized Exposure	Maximum Net Termination Exposure
Aaa/AAA	NA	$100.0 million	$100.0 million
Aa/AA Category	$70.0 million	$30.0 million	$100.0 million
A/A Category	$50.0 million	$20.0 million	$70.0 million
Below A3/A-	$50.0 million	None	$50.0 million

If the exposure limit is exceeded by counterparty, the County shall conduct a review of the exposure limit per counterparty. The County, in consultation with its Swap Counsel and Municipal Advisor, shall explore remedial strategies to mitigate this exposure.

The County's swap exposure to any single counterparty will be limited to 25% of the counterparty's capitalization.

11. Procurement Process

The County may either negotiate or competitively bid interest rate swap transactions with qualified swap providers. The qualified swap providers will be selected by the Chief Financial Officer of the County, or in the case of the Department of Aviation, the qualified swap providers will be selected by the Director of Aviation and the Chief Financial Officer of the County.

12. Termination Provisions and County Liquidity

Optional Termination: All interest rate swap transactions shall contain provisions granting the County the right to optionally terminate a swap agreement at any time over the term of the

agreement. In general, exercising the right to optionally terminate an agreement produces a benefit to the County, either through receipt of a payment from a termination, or if a termination payment is made by the County, in connection with a corresponding benefit from a change in the related County debt or investment, as determined by the County. The CFO, as appropriate, in consultation with the County's finance team, shall determine if it is financially advantageous for the County to terminate a swap agreement.

Termination Events: A termination payment to or from the County may be required in the event of termination of a swap agreement due to a default by or a decrease in the credit rating of either the County or the counterparty. Prior to entering into the swap agreement or making any such termination payment, as appropriate, the CFO shall evaluate whether it would be financially advantageous for the County to enter into a replacement swap as a means of offsetting any such termination payment.

Any swap termination payment due from the County shall be made from available County monies. The CFO shall report any such termination payments to the County at the next BOCC meeting.

Available Liquidity: The County shall consider the extent of its exposure to termination payment liability in connection with each swap transaction, and the availability of sufficient liquidity to make any such payments that may become due.

13. Term and Notional Amount of Swap Agreement

The County shall determine the appropriate term for an interest rate swap agreement on a case-by-case basis. The slope of the interest rate swap curve, the marginal change in swap rates from year to year along the swap curve, and the impact that the term of the swap has on the overall exposure of the County shall be considered in determining the appropriate term of any swap agreement. For any swap agreement entered into in connection with the issuance or carrying of bonds, the term of such swap agreement shall not extend beyond the final maturity date of such bonds.

14. Collateral Requirements

As part of any swap agreement, the County may require collateralization or other credit enhancement to secure any or all swap payment obligations of the counterparty. As appropriate, the County may require collateral or other credit enhancement to be posted by each swap counterparty under the following circumstances:

- Each counterparty shall be required to post collateral, in accordance with its (or its guarantor's) credit rating, equal to the positive net termination value of the swap agreement.

- Collateral shall consist of cash, U.S. Treasury securities and U.S. Agency securities.

- Collateral shall be deposited with a custodian, acting as agent for the County, or as mutually agreed upon between the County and each counterparty.

- The market value of the collateral shall be determined on at least a monthly basis.

- The County will determine reasonable threshold limits for the initial deposit and for increments of collateral posted thereafter.

- The CFO shall determine on a case-by-case basis whether other forms of credit enhancement are more beneficial to the County.

In connection with any collateralization requirements that may be imposed upon the County in connection with a swap agreement, the County may post collateral or it may seek to obtain swap insurance in lieu of posting collateral. The CFO shall recommend a preferred approach to the County on a case-by-case basis.

15. Reporting Requirements

The County's finance team will monitor any interest rate swaps that the County enters into on at least a monthly basis. The County's CFO will provide a written report to the BOCC regarding the status of all interest rate swap agreements on at least an annual basis and shall include the following information:

- Highlights of all material changes to swap agreements or new swap agreements entered into by the County since the last report.

- Market value of each of the County's interest rate swap agreement.

- For each counterparty, the County shall provide the total notional amount position, the average life of each swap agreement, the available capacity to enter into a swap transaction, and the remaining term of each swap agreement.

- The credit rating of each swap counterparty and credit enhancer insuring swap payments, if any.

- Actual collateral posting by each swap counterparty, if any, under each swap agreement and in total by that swap counterparty.

- A summary of each swap agreement, including but not limited to the type of swap, the rates and dollar amounts paid by the County and received by the County, and other terms.

- Information concerning any default by a swap counterparty under a swap agreement with the County, and the results of the default, including but not limited to the financial impact to the County, if any.

- A summary of any planned swap transactions and the projected impact of such swap transactions on the County.

- A summary of any swap agreements that were terminated.

16. Swaps Accounting Treatment

The County shall comply with any applicable accounting standards for the treatment of swaps and related financial instruments. The County and the County's external auditors shall implement the appropriate accounting standards.

17. Periodic Review of Interest Rate Swap Policy

The CFO and the County's municipal advisors shall review its swap policy on a periodic basis and recommend appropriate changes.

APPENDIX F

Procedures for Debt Issuance/Timetables

(See attached sample schedules)

1. General Obligation Bonds
2. General Obligation Revenue Bonds
3. Medium-Term Bonds
4. Assessment District Bonds
5. Revenue Bonds

General Obligation Bonds

Sample Schedule

Number of Weeks From Start	Event
0	BCC adopts Debt Management Commission ("DMC") Notice Resolution
3	DMC meets and adopts Approval Resolution
4	County adopts Election Resolution
6	Bond question submitted to County Clerk and Registrar of Voters (3rd Monday in July*)
21	General election/Bond election (Tuesday after the first Monday in November)
22	BCC adopts Canvass Resolution
24	BCC adopts Sale Resolution
26	Due diligence meeting to review the official statement
29	Bond Sale BCC adopts Bond Ordinance
32	Bond Closing

* Subject to Legislative adjustment

General Obligation Revenue Bonds

Sample Schedule

Number of Weeks From Start	Event
0	Revenue source entity requests the County to issue bonds
1	BCC adopts Debt Management Commission (DMC) Notice Resolution
3	DMC meets and adopts Approval Resolution
5	BCC adopts Resolution of Intent and Resolution calling hearing of Resolution and Sale Resolution
6	Publish Notice (Begin 90 day Petition Period) and Notice of Public Hearing
9	Hold Public Hearing
19	End of 90 day Petition Period
20	Due diligence meeting to review the official statement
21	BCC adopts Bond Ordinance
23	Bond Sale
26	Bond Closing

Medium-Term Bonds*

Sample Schedule

Number of Weeks From Start	Event
0	BCC adopts Resolution calling for Public Hearing
2	Publish Notice of Hearing
3	Public Hearing; Board adopts Resolution authorizing Medium-Term financing (10 days after Notice of Hearing published)
	BCC adopts Sale Resolution
5	Send information packet to Department of Taxation
8	Due diligence meeting to review the official statement
10	BCC adopts Bond Ordinance
15	Bond Sale
18	Bond Closing

* Note: Medium-term financing exceeding ten years must receive the approval of the Debt Management Commission.

Assessment District Bonds

Sample Schedule

Number of Weeks From Start	Event (Note: Various assessment procedural steps take anywhere from six to eighteen months prior to the events listed below.)
0	Board adopts Assessment Ordinance
2	Assessment Ordinance Effective Begin 30-day Cash Payment Period
6	End of 30-day Cash Payment Period
8	BCC adopts Bond Sale Resolution
9	Due Diligence Meeting
12	Bond Sale
	BCC Adopts Ordinance Authorizing Issuance of Bonds
	CFO signs Sale Certificate Establishing Assessment Rate of Interest
15	Bond Closing

Revenue Bonds

Sample Schedule

Number of Weeks From Start	Event
0	BCC adopts Sale Resolution
3	Due Diligence Meeting
5	BCC adopts Bond Ordinance
10	Bond Sale
13	Bond Closing
