TRAFFIC CONTROL DEVICE PRE-STRINGING

There will be allowances for equipment to be pre-strung and left on site until the project is complete or work stops under the following conditions:

- A. In less than 60' right-of-ways, equipment will be allowed to stay on site for up to 72 hours without activity occurring.
- B. In right-of-ways 60' and greater, equipment will be allowed to stay on site for up to 24 hours without activity occurring.

The equipment may be stored on site in a safe and organized manner under the following conditions:

- A. Equipment cannot be stored in gutters.
- B. Stored behind sidewalks or on backside of streetlight poles so not impede sidewalk traffic.
- C. If there is no room to store night set tapers they will need to be picked up daily.
- D. Storage will be allowed on medians that are hardscaped (asphalt, concrete, dirt, gravel). No storage is allowed in medians that are landscaped with plants.
- E. Storage on shoulders is permissible as long as the devices are stored as far away from the travel way as possible.
- F. Equipment is to be maintained daily.

Pre-stringing will not be allowed and setups will be picked up daily in the resort corridor area. The resort corridor area is noted as the following streets:

Las Vegas Blvd from Sahara Avenue to Robindale Road (storage may occur in the undeveloped areas where there is no curb and gutter but is subject to conditions A, E, and F above).
