

SECTION 12.0: APPLICABILITY AND GENERAL REQUIREMENTS FOR PERMITTING STATIONARY SOURCES

12.0 Applicability and General Requirements..... 1

12.0.1 Applicability 1

12.0.2 General Requirements 2

12.0.3 Reserved..... 2

12.0.4 Permittee Responsibility to Comply With Control Strategy..... 2

12.0.5 Stack Height..... 2

12.0.6 General Requirements for Records and Reports 2

12.0 Applicability and General Requirements

12.0.1 Applicability

The requirements of Sections 12.0, 12.1, 12.2, 12.3, 12.4, 12.5, 12.9, and 12.11 (the Section 12 series) apply as follows:

- (a) The Section 12 series is applicable to any stationary source located in Clark County, Nevada, except for a plant that generates electricity by using steam produced by the burning of fossil fuel or an electrical generating facility constructed on a site previously used for the production of electricity from a coal-fired electric generating plant, which shall be permitted under the jurisdictional requirements of the Nevada Division of Environmental Protection (NDEP).
- (b) Section 12.1 is applicable to any stationary source located in Clark County that has the potential to emit a regulated air pollutant equal to or greater than the thresholds listed in Section 12.1.1(e) but less than the major stationary source thresholds listed in Sections 12.2.2(ff) or 12.3.2(r), or 40 CFR § 70.2, or a stationary source located in a nonattainment area that is subject to a state implementation plan regulation requiring it to obtain a minor source permit. This includes any Part 70 source that is exempt from the requirement to obtain a Part 70 Permit and that has a potential to emit equal to or greater than the thresholds listed in Section 12.1.1(e).
- (c) Section 12.2 is applicable to any stationary source located in Clark County that has the potential to emit a regulated air pollutant that is equal to or greater than the thresholds listed in Section 12.2.2(ff) or makes any change that meets the definition of a major modification in Section 12.2.2(dd) and is located in an area designated attainment or unclassified for the specific pollutant emitted.
- (d) Section 12.3 is applicable to any stationary source located in Clark County that has a potential to emit a regulated air pollutant that is equal to or greater than the thresholds listed in Section 12.3.2(r) or makes any change that meets the definition of a major modification in Section 12.3.2(q) and is located in an area designated nonattainment for the specific pollutant emitted.
- (e) Sections 12.4 and 12.5 are applicable to any stationary source that is required to obtain a Part 70 operating permit. Section 12.4 contains the application requirements for any major source subject to the requirements of Sections 12.2, 12.3 or 12.5.
- (f) Section 12.11 is applicable to any stationary source that is not a major stationary source, with a potential to emit that equals or exceeds the

thresholds listed in Section 12.1.1(e) and that meets the applicability requirements specified in Section 12.11.1.

12.0.2 General Requirements

All stationary source, including any stationary source not required to obtain a permit to operate under these regulations, shall be subject to other applicable requirements that regulate activities at stationary source, even though a permit to operate is not required. Such applicable requirements include, but are not limited to, opacity standards, nuisance prohibitions, and fugitive dust control.

12.0.3 Reserved

12.0.4 Permittee Responsibility to Comply With Control Strategy

No approval of an authority to construct or authority to operate permit issued pursuant to the Section 12 series shall affect the responsibility of the permittee to comply with the applicable requirements of the Nevada State Implementation Plan.

12.0.5 Stack Height

The degree of emission limitation required of any source of any pollutant shall not be affected by so much of any source's stack height that exceeds good engineering practice or by any other dispersion technique as determined by the procedures of 40 CFR § 51.118 and the EPA regulations cross-referenced therein as in effect on July 1, 2012 and as incorporated herein by this reference.

12.0.6 General Requirements for Records and Reports

- (a) The owner or operator of any source operating under a permit issued pursuant to the provisions of the Section 12 series shall maintain records on the nature and amount of emissions from such source and any other information deemed necessary by the Control Officer to determine whether such source is in compliance with an applicable emission limitation or other applicable requirement. Records and any supporting information required under Section 12.0.6(a) shall be retained for at least 5 years from the date of the monitoring sample, measurement, report or application. Support information includes all calibration and maintenance records and all original strip chart recordings for continuous monitoring instrumentation and all copies of all reports required by the permit.
- (b) The information required by Section 12.0.6(a) shall be reported as specified and required by the applicable condition(s) of the permit issued to the owner or operator of the source or facility. Upon a written request from the Control Officer, the owner or operator submit the information required by Section 12.0.6(a) within 30 days.

- (c) Emission data obtained pursuant to Section 12.0.6(b) from owner or operator of any source permitted under the provisions of the Section 12 series shall be correlated with applicable emission limitations and/or other applicable control measures. The data and the results of the correlation shall be made available to the public for review during normal business hours at the department office located at 4701 West Russell Road, Las Vegas, Nevada 89118.
