## AUTHORIZATION FOR POWER THROUGH THE METER FOR RESIDENTIAL USE

Site Address/Tract Name: \_\_\_\_\_

Building Permit Number(s): \_\_\_\_\_

Permittee is granted authorization to connect electric power through the meter for work constructed pursuant to the permits listed above. This authorization is granted only for the site name above and is subject to the Building Administrative Code of Clark County, Chapter 22.02 of the Clark County Code and to the following conditions and requirements.

1. Buildings shall not be occupied for purposes other than doing construction work necessary to complete the building, within the scope of the permit and in conformance with the approved plans, until authorized by the Building Official.
2. This authorization is valid only when the building permit(s) listed above are active. This authorization shall expire concurrently when the building permit expires.
3. The Permittee assumes full responsibility and liability for:
  - a. Damage to the meter panel
  - b. Safety of the work force
  - c. Direct or indirect damages resulting from the removal of electric power whether removed by the Permittee or the Department of Development Services.
4. The Permittee shall defend, indemnify and hold Clark County harmless against all claims, demands, damages or costs that Clark County may incur, or for which Clark County may become responsible, by reason of the Permittee's operations or obligations pursuant to this authorization, including attorney fees and costs. This obligation shall survive any termination of this authorization.
5. This authorization for power will become invalid upon misuse or deviation from the work authorized. Once authorization is invalid, the Permittees shall initiate an immediate meter disconnect order to the serving utility.
6. Violations of this authorization or failure by the Permittee to take prompt and final action to have the service disconnect when required will be cause for the Department of Development Services to take direct action with the serving utility to disconnect power pursuant to Section 22.02.230(A) of the Clark County Building Administrative Code.
7. An agreement between the Permittee and the serving utility is also required prior to the installation of the electric meter.

As Permittee, I understand and accept full responsibility to comply with the conditions and requirements of this authorization.
