

Clark County Department of Building & Fire Prevention

4701 West Russell Road, Las Vegas, NV 89118 ~ (702) 455-3000

Standard Plan Process for Residential Development Building Permit Guide

Jerome A. Stueve, P.E., Director
Samuel D. Palmer P.E., Assistant Director • Girard Page, Fire Marshal

Part I. General Information

Commencing with the effective implementation dates of the currently adopted edition of the International Residential (IRC) Code, plans associated with residential subdivisions will be subject to the following submittal, review, and permitting procedures. To simplify and streamline the procedures, they have been separated into three (3) distinct steps, resulting in the issuance of permits.

Part II. Plan Submittal (Step 1)

Standard plans (those intended to be built more than once) will be reviewed and permitted on a site-specific (subdivision) basis. Only the plans that are reviewed and approved for the specific subdivision identified on the tentative map will be issued permits for that subdivision. Submittal requirements include:

Building Plans:

- I. Two (2) complete sets of plans, drawn to scale, on a minimum sheet size of 24" x 48", stamped, and sealed by appropriate design professionals, containing the following:
 - Geotechnical Report (not more than one year old or with current update letter)
 - Foundation Plan and footing details
 - Floor Plan with dimensions
 - Floor/Roof Framing Plans with all header/beam sizes
 - Front, back and side elevations
 - All necessary cross sections and details
 - Structural Calculations, stamped and signed by a Nevada Registered Design Professional with all details on the plans
 - Truss Calculations (stamped and signed)
 - Fireplace details (if not gas; Manufacturer's Name, Model Number, and ICC Number).
 - International Energy Code Calculations
 - Two copies of a Landscape Plan for any common areas within the Subdivision.
 - Two copies of the approved Water Utility Plan.
- II. One unstamped set of architectural plans
- III. Electrical Plans (two copies):
 - Electrical Floor Plan
 - Electrical Load Calculations and Panel Board Schedules
- IV. Plumbing Plans (two copies):
 - Plumbing Floor Plan
 - Gas Piping Plan
- V. Tentative Map

-
- Three (3) copies of the approved Tentative Map of the subdivision including the Tentative Map number

VI. Building Footprints

- Three (3) copies of a fully dimensioned, to scale footprint of each proposed Standard Plan model with option(s). See Example A. The footprint (at a scale no smaller than 1" = 10', and 1/8" minimum font size) must include:
 - Dimensioned architectural intrusions
 - Pop-outs and Overhangs
 - Minimum lot depth and width for interior and corner lots required to meet minimum Title 30 and International Residential Code setback requirements. Minimum setbacks shall be noted on the plan.
 - Model Number
 - Breakdown of Square Footage
 - Number of Stories
 - Lot Coverage Square Footage
 - Number of Fire Places
 - Overall Building Height
 - Denote Garage and Garage Door Location

Plan review fees will be based on a hourly review rate as defined in the Clark County Building Administrative Code.

A tracking number (43-XXXX) will be assigned to the application and given to the applicant. This tracking number will provide the applicant with a means of following the status of plans through the Building Plans Examination Process and the Zoning Review of the plans. Applications will also be assigned an additional tracking number (15-XXXX) for use during the Subdivision Plan Review step.

NOTE: Model options are limited to an increase of 10% of the total square footage and no more than two options per plan will be approved. Fireplaces, balconies, media niches, patio covers, and additional second floor area where previously shown as open are not considered options when applying the above restriction. Model options will not be allowed to include any additional levels (above or below) the number of floors indicated on the original submittal. This will require assignment of a separate "Standard Plan" (53-XXXX) number.

Once the plans and footprints are approved, the applicant will be notified of the assigned Standard Plan Number (53-XXXX). The applicant will need to submit completed Electrical, Plumbing, and Mechanical Permit Applications for each model.

Upon issuance of a (53-XXXX) number, a plans examination fee work-up will be performed on each model. Applicants will be notified that the plans are ready for pick-up and informed of any outstanding Building and Comprehensive Planning Zoning Plans Check fees. Payment of the outstanding fees will be required prior to transfer of the approved plans and footprints to the applicant.

In addition to one set of approved plans and footprints for field construction, the applicant will also be given a complete set of permit fee work-up sheets on each model, indicating all Building Permit and Sub-Permit Fees, Residential Construction Tax, Transportation Tax, Public Facilities Needs Assessment Tax (if any), etc., associated with permit issuance within the specific subdivision in which the model will be constructed.

Part III. Subdivision Plan Review (Step 2)

In order to determine all applicable Land Use conditions of approval (i.e., one-story homes along the peripheral boundary; intense landscaping along major streets, etc.), Subdivision plan reviews will be conducted after the Final Map has recorded.

Submittal criteria are as follows:

- Two (2) 24" x 36" copies of the recorded Final Map with reference to the Tentative Map.
- Completed Landscape Certificate of Compliance.
- Completed Final Map/Approved Grading Plan Certificate of Compliance.

Comprehensive Planning Zoning Plans Check will review the plans for compliance to all Land Use Conditions of Approval and Title 30 requirements or other applicable zoning codes in effect at the time of review. All minimum setbacks as well as any special conditions of approval shall be noted on the plans. Upon approval of the Subdivision Plan, a Plans Examination fee, based on an hourly rate, will be assessed and collected. One copy of the approved Subdivision Plan and associated documentation is to be on the job site and the other is retained by Clark County Department of Building.

Part IV. Site (Lot) Plan Approval and Permit Issue (Step 3)

In order to obtain a site (lot) plan approval and have a building permit issued, applicants must bring the following items to the Department of Building for either an "Over-the-Counter" or "Drop-off" permitting service:

- A completed Building Permit Application (forms are available on our website) accompanied by two (2) copies of each site (lot) plan on minimum 8 ½" x 11", maximum 11" x 17" sized paper. (See Example B) The following information must be on the site (lot) plan in order to be processed:
 - Address with Book and Page number, lot, block, and recorded Subdivision name
 - Approved Grading Permit number
 - Approved Step 2 - Subdivision Plan number
 - Approved Standard Plan (53-XXXX) and Model numbers
 - All adjacent streets (with names) and/or private drives shown to the centerline and dimensioned
 - The approved building footprint with overhangs of the (53-XXXX) plan which must match the plan approved in Part II.
 - All easements of record, setbacks, and property lines, fully dimensioned. Please note that lot dimensions and easements must match the recorded map.
 - Designation of appropriate scale (must be clear and easy to read)
 - North arrow
- The building's footprint, property lot lines, and any overhang designations must be distinguishable from other graphics.

NOTE: Please do not include Finished Floor Elevations on the site (lot) plan as they are included on the approved grading plan. The plan does not require stamp and signature of a Civil Engineer.

Processing/Permit Issue:

Up to three (3) site (lot) plan packages will be reviewed “over-the-counter” at a time. This process functions in the following manner:

- Applicant takes completed permit applications to the Tract Pick-Up and Drop-Off Counter to obtain site-specific application numbers.
- Applicant proceeds to the Comprehensive Planning Zoning Plans Check counter with the three (3) plan packages and assigned application numbers. Zoning Plans Examination staff will review the plans for compliance to the approved Final Map (Subdivision) plan and footprints on file.
- Upon approval of the site (lot) plans by Comprehensive Planning Zoning Plans Check, the applicant returns to the Permit Issue Counter where permits can be issued.

NOTE: Applicant must provide appropriate proof of Sanitation clearance PRIOR to permits being issued. Tracts outside the Las Vegas Valley Water District service area will be required to provide water clearance from the water purveyor.

- Upon payment of all applicable fees, permits will be issued. Applicant is to keep a copy of the approved site (lot) plan, building card, and permit for the job site. The approved site plan, building card, and permit must be made available along with a copy of the approved subdivision plan and construction drawings for examination by the Building Inspector.

Applicants with more than three (3) site (lot) plans at a time will need to “drop off” the applications with the Tract Pick-Up and Drop-Off staff. The Tract Staff will then set up the applications and forward them to Comprehensive Planning Zoning Plans Check.

- Applicants will be notified if there are issues that need to be resolved with the plans and when the plans have been approved by Comprehensive Planning Zoning Plans Check and are ready for permit issuance.

Part V. Other Items

Model Complexes:

Application and permit issuance for up to six (6) early models (Final Map not yet recorded) will be processed as follows:

Once the subdivision Standard Plans (Step 1) have been approved and assigned a 53-XXXX number AND the Final Map (Subdivision) has been submitted for Technical Review, the applicant can submit two (2) copies of the following:

- Subdivision Plan identifying the location of the models
- 8 ½ x 11 Site Lot Plan for each model (minimum 8 ½“ x 11”, maximum 11” x 17”)
- Approved Grading Plan and associated Detail Sheets
- Approved Water Utility Plans

-
- Two(2) copies of landscape plan for any adjacent common areas and a typical lot layout
 - Completed Landscape Certificate

Once reviewed and approved by Comprehensive Planning Zoning Plans Check, permits can be issued.
NOTE: Applicants must provide appropriate proof of sanitation and water clearance PRIOR to permits being issued.

Re-Sites (construction of the same model in different subdivision locations):

In those cases when an applicant wants to build using an approved Standard Plan (already issued a 53-XXXX number) where the site conditions and land use approvals do not alter the approved plans and building footprint, the applicant shall contact Building Plans Examination for a pre-submittal meeting. The purpose of the meeting is to determine the feasibility of the request and establish appropriate re-submittal requirements.

NOTE: Review of these plans will be done on an hourly basis (minimum of one hour).
