A. POLICY

The Building Plans Examination Quality Control Reviews are an essential part of each employee’s performance evaluation process and the Building Division’s education program. QCR’s will assist in evaluating an employee’s job performance and will initiate or reinforce their training and development. The completed QCR form will provide a control and feedback tool for the building plans examiner and their supervisor.

B. PROCEDURE

The Quality Control Reviews will evaluate each employee’s performance for both the technical and non-technical aspects of their assigned duties and each form is tailored to match their assigned duties. The Quality Control Review Forms are to be completed and signed by the supervisor performing the QCR and the employee. The supervisor will discuss the QCR with the employee in detail and will initiate any necessary training. A copy of training schedule will be attached to the QCR. Each employee should receive four (4) technical and non-technical QCR’s each year. Copies of each QCR will be placed in each employee’s information file.

**Topics Covered:** Comments shall be specific and shall include, but not be limited to, listing of errors or discrepancies in relation to accessibility, building, electrical, plumbing, or mechanical code applications; completeness of the proper forms, paperwork and computer entries; proper use of equipment and following established procedures.

**Other Comments:** Customer comments and statement if additional training in the field or classroom is required.
