Revision to the Nevada State Implementation Plan for the 2015 Ozone NAAQS: Nonattainment Major NSR Requirements

Las Vegas Valley Nonattainment Area
Clark County, Nevada

July 2021
EXECUTIVE SUMMARY

This state implementation plan (SIP) revision is submitted by the Clark County Department of Environment and Sustainability, formerly the Clark County Department of Air Quality, for inclusion in the Nevada SIP for the 2015 8-hour ozone National Ambient Air Quality Standards. The submission satisfies the SIP planning requirements for the Las Vegas Valley nonattainment area for the 2015 8-hour ozone NAAQS with respect to the major New Source Review (NSR) preconstruction permitting requirements.

On October 1, 2015, the U.S. Environmental Protection Agency revised the 8-hour ozone NAAQS, lowering both the primary and secondary standards from 0.075 to 0.070 parts per million. When EPA establishes a new NAAQS or revises an existing one, EPA also must designate areas as meeting (attainment) or not meeting (nonattainment) the NAAQS. EPA designated the Las Vegas Valley as a marginal nonattainment area for the 2015 8-hour ozone NAAQS effective August 3, 2018.

Section 172(b) of the Clean Air Act, and EPA’s implementing regulations require states to submit a nonattainment major NSR plan or plan revision no later than 36 months after the effective date of an area’s designation. For Clark County, this submission deadline is August 3, 2021. The SIP submission must satisfy the requirements located in 40 CFR §51.165.

This document addresses the nonattainment major NSR reconstruction permitting requirements and certifies that Clark County’s existing regulations in Sections 12.3 and 12.7.5 satisfy the minimum requirements for the 2015 8-hour ozone NAAQS NNSR program. The DES certifies that its existing regulations are as least as stringent as the minimum requirements at 40 CFR §51.165 for ozone and its precursors.

1.0 INTRODUCTION

The Clean Air Act (CAA) requires the U.S. Environmental Protection Agency (EPA) to set National Ambient Air Quality Standards (NAAQS) to protect public health from six common air pollutants, including ozone. On October 1, 2015, EPA revised the 8-hour ozone NAAQS, lowering the primary (health-based) and secondary (welfare-based) standards from 0.075 to 0.070 parts per million (80 FR 65292). When EPA establishes a new NAAQS or revises an existing one, EPA must designate areas as meeting or not meeting the standard; each state must then develop a state implementation plan (SIP) that describes how these areas will attain or maintain the standard. SIP requirements depend on the area’s designation. EPA designated the Las Vegas Valley as a marginal nonattainment area for the 2015 8-hour ozone NAAQS effective August 3, 2018 (83 FR 25776).

1.1 PURPOSE

The purpose of this SIP submittal is to satisfy specific nonattainment area planning requirements established in the CAA and in the final implementation rule for the 2015 ozone NAAQS (83 FR 62998) related to the nonattainment major NSR (NNSR) preconstruction permitting program. On June 4, 2018, EPA designated the Las Vegas Valley as a marginal nonattainment area for the 2015 ozone NAAQS effective August 3, 2018 (83 FR 25776). Under the final implementation rule, requirements for marginal nonattainment areas include the submittal of a NNSR program that meets the minimum requirements of EPA’s regulations at 40 CFR §51.165. See 40 CFR § 51.1314. This document meets these SIP submittal requirements.

1.2 EPA’s 2015 8-hour Ozone NAAQS Implementation Rule

After EPA’s 2015 revision to the 8-hour ozone NAAQS, EPA promulgated an implementation rule setting forth the minimum requirements for nonattainment area SIPs for the new NAAQS (83 FR 62998). With respect to NNSR requirements, EPA declined to make substantive changes to the existing NNSR regulations at 40 CFR §51.165, after finding that the rules, as already promulgated, satisfied CAA requirements. In the final rule, EPA also codified changes to §51.165(a)(11), in response to a reconsideration petition related to interprecursor trading requirements promulgated in the 2008 8-hour ozone NAAQS implementation rule. (See Section 2.3 for additional discussion on these provisions.). These changes in the 2015 8-hour ozone NAAQS implementation rule clarified existing requirements for interprecursor trading and eliminated EPA approval for case-specific trading ratios.

In sum, EPA’s final 2015 8-hour ozone NAAQS implementation rule promulgated a requirement that State SIPs meet existing 40 CFR §51.165 requirements. See 40 CFR § 51.1314. In the rule, EPA set a deadline to submit a SIP or SIP revision to meet the NNSR requirements within three years after EPA designates an area nonattainment. For Clark County, this submission deadline for the 2015 8-hour ozone NAAQS NNSR submission is August 3, 2021.
1.3 Clark County Nonattainment Area

Figure 1.3-1 shows the Las Vegas Valley nonattainment area for the 2015 8-hour ozone NAAQS, defined as hydrographic area (HA) 212. HA 212 is the geographic area subject to NNSR program requirements. The area encompasses approximately 1,500 square miles, largely under federal control.

Figure 1-1. Las Vegas Valley Nonattainment Area (HA 212).
2.0 CERTIFICATION OF EXISTING NNSR PROGRAM

The DES certifies that its existing NNSR program is as least as stringent as the requirements at 40 CFR §51.165 for ozone and its precursors and includes all the necessary requirements to meet EPA’s minimum requirements for the 2015 8-hour ozone NAAQS NNSR program.

2.1 Clark County’s Existing NNSR Rules

Clark County’s existing NNSR regulations are in Section 12.3 of the Clark County Air Quality Regulations (AQR). Clark County last revised these regulations on March 18, 2014. EPA approved the rules into the SIP on October 17, 2014 after finding that the regulations were consistent with the CAA and EPA’s regulation and guidance (79 FR 62351). At the same time, EPA also approved into the SIP Section 12.7.5, which includes the regulation governing the criteria an emissions reduction must satisfy before the Control Officer may issue an Emission Reduction Credit (ERC). An ERC may be used to satisfy the offset requirements of the Section 12.3 NNSR program.

2.2 Changes to EPA’s Rules Since 2014

Since EPA approved the Clark County’s Section 12.3 NNSR and Section 12.7.5 ERC provisions as meeting the CAA and EPA’s minimum program requirements, EPA promulgated several changes to the 40 CFR §51.165 requirements. These changes include rules addressing:

- 2008 Ozone Implementation (80 FR 12263)
- PM$_{2.5}$ Implementation (81 FR 58009)
- Public Notice Requirements (81 FR 58009)
- Aggregation of Projects (83 FR 57324)
- Project Emissions Accounting (84 FR 39244)
- Error Corrections (84 FR 70092)

These changes are not relevant for implementation of the 2015 8-hour ozone NAAQS because (1) the changes involved other NAAQS pollutants for which Clark County is not in nonattainment, or (2) the EPA did not create minimum SIP requirements for state rules in the action. The Public Notice Requirements Rule added a paragraph to 40 CFR §51.165(i) which re-codified requirements for public participation already required by 40 CFR §51.161 and allowed electronic notice to satisfy these requirements as an alternative to notice in a newspaper. Section 12.3 already satisfies these minimum requirements for public participation in Section 12.3.8 by requiring both electronic and printed notice.

2.3 Recent Court Decision Affecting EPA’s Minimum Program Requirements

One provision in EPA’s existing 40 CFR §51.165 regulation allows for interprecursor trading to meet the CAA offset requirement. See §51.165(a)(11). The offset requirement requires a new major stationary source or major modification to acquire emissions reductions equal to or greater than the amount of a proposed emissions increase. For the ozone NAAQS, the offset requirement applies to emissions increases of the two ozone precursor pollutants: nitrogen oxides (NOx) and volatile organic compound (VOC). Interprecursor (referred to as “interpollutant” in the existing
Section 12.3 rules) trading allows emissions increases in one precursor to be offset by emissions decreases in another precursor pollutant.

Historically, EPA’s guidance and regulations expressly provided for trading precursor emissions reductions to satisfy offsets requirements. See e.g “Improving Air Quality with Economic Incentive Programs” (US EPA, 2001) and EPA’s PM2.5 Implementation rule (73 FR 28321, May 16, 2008). Clark County’s existing SIP-approved NNSR regulation includes provisions for interpollutant emissions offsets in Section 12.3.6.3(b) and (c). EPA approved Clark County’s rule as meeting the minimum requirements in EPA’s 2014 version of §51.165.

In 2015, after approving Clark County’s 2014 rule revisions, EPA reaffirmed state authority for interprecursor trading for purposes of the 2008 8-hour ozone NAAQS implementation rule (80 FR 12264). At that time, however, several parties petitioned the D.C. Circuit Court to review EPA’s 2008 NNSR implementation rule. After EPA granted a petition to reconsider the interprecursor trading provisions of that rule, the Court severed the interprecursor trading from other challenges and did not resolve the claim. EPA then included interprecursor trading provisions in its 2015 8-hour ozone NAAQS implementation rule. Petitioners again challenged the provisions. Subsequently, the D.C. Circuit Court ruled that the CAA does not allow for interprecursor trading to satisfy the offset provisions and vacated this aspect of EPA’s 2008 and 2015 8-hour ozone NAAQS implementation rules [Sierra Club v. EPA, No. 15-1465 (D.C. Cir. 2021)].

EPA has yet to issue guidance on the effect of this vacatur on approved SIPs and certifying compliance for the 2015 ozone NAAQS. The vacatur of this aspect of the 2008 and 2015 regulations means that EPA’s regulations revert to the previous version of the regulations - - which continue to provide for interprecursor trading in NNSR SIPs at §51.165(a)(11). EPA’s previous approval of Clark County’s Section 12.3 regulations was based on this now reinstated version of the rule. In addition, the matter before the Court solely addressed EPA’s authority to establish interprecursor trading as part of its 2008 and 2015 ozone implementation regulations, and the Court did not address what flexibility EPA may have to approve alternative rules in SIPs when the program would be more stringent than the requirements of the CAA, or whether EPA has an obligation to revise existing SIPs that provide for interprecursor trading under previous, long-settled regulatory actions.

Notwithstanding the uncertainty with respect to interprecursor trading requirements in SIPs, DES asserts that Clark County’s existing SIP-approved NNSR program still meets 40 CFR §51.165 requirements for the 2015 8-hour ozone NAAQS. Sections 12.3.6.3(b) (for ozone) and (c) (for PM2.5) only provide the Control Officer with discretion to allow interpollutant trading; the rules do not provide carte blanche rights to stationary sources to use interpollutant trading to satisfy offset requirements. Through this certification, DES commits not to approve interpollutant trades for purposes of satisfying 2015 8-hour ozone NAAQS offset requirements. Moreover, the regulatory provisions further provide that the EPA must approve any use of the trading provisions, which DES is confident the EPA would not approve in contradiction to the Sierra Club decision. The effect of DES’s commitment and EPA’s oversight authority renders the existing Section 12.3.6.3(b) inoperative for the 2015 8-hour ozone NAAQS.
Because Section 12.3.6.3(b) is essentially without effect, these recent developments related to interprecursor trading provisions in 40 CFR §51.165 do not affect DES’ certification of its existing regulations as meeting EPA’s minimum requirements for approved SIPs, but DES further commits to revise Section 12.3.6.3(b) on the next occasion that it opens the rule for revision.

2.4 How Clark County’s Regulations Meet Minimum NNSR SIP Requirements

Table 2-1 provides a detailed explanation of how DES’ regulations meet EPA’s minimum requirements for an approvable NNSR SIP. Accordingly, DES certifies that its existing NNSR program is as least as stringent as the requirements at 40 CFR §51.165 for ozone and its precursors.

</tbody>
</table>
3.0 CONCLUSION

This document certifies that Clark County’s SIP-approved NNSR program in Sections 12.3 and 12.7.5 meet EPA’s minimum SIP requirements for the 2015 8-hour ozone NAAQS NNSR program for the Las Vegas Valley nonattainment area. Having fulfilled the minimum program requirements, DES asks EPA to approve this submission as a revision to the Nevada SIP for the 2015 8-hour ozone NAAQS.

NOTICE OF PUBLIC COMMENT PERIOD AND PUBLIC HEARING
ON THE PROPOSED OZONE STATE IMPLEMENTATION PLAN REVISION

NOTICE IS HEREBY GIVEN of a public comment period and public hearing on the proposed Revision to the Nevada State Implementation Plan for the 2015 Ozone NAAQS: Nonattainment Major NSR Requirements; Las Vegas Valley Nonattainment Area, Clark County, Nevada (O3 SIP Revision). The U.S. Environmental Protection Agency (EPA) designated the Las Vegas Valley as a marginal nonattainment area for the 2015 ozone National Ambient Air Quality Standard (NAAQS), effective August 3, 2018. Under the Clean Air Act and final implementation rule for the 2015 standard, Clark County is required to meet certain nonattainment area planning requirements. The proposed O3 SIP revision is intended to satisfy the nonattainment new source review program requirements for the Las Vegas Valley nonattainment area. If adopted, this O3 SIP Revision will be submitted to the state of Nevada and EPA as a revision to the Nevada State Implementation Plan.

NOTICE IS FURTHER GIVEN that a 30-day public comment period will begin on May 26, 2021, and end at 4:00 PM on June 25, 2021. The public may review and provide written comments on the proposed O3 SIP Revision during this period. The Board of County Commissioners will consider the proposed SIP revision, along with all written and any oral public comments, at a public hearing at 10:00 AM on July 20, 2021, in the Commission Chambers, Clark County Government Center, 500 South Grand Central Parkway, Las Vegas, NV.

A copy of the proposed O3 SIP Revision is available for review on the Department of Environment and Sustainability (DES) website at: https://www.clarkcountynv.gov/government/departments/environment_and_sustainability/public_communications/public_notices.php and may also be obtained by contacting Araceli Pruet at (702) 455-3206.

Any written comments must be received by DES at 4701 W. Russell Road, Suite 200, Las Vegas, Nevada 89118, by 4:00 PM on June 25, 2021. Comments should be addressed to Araceli Pruet at the same mailing address, emailed to araceli.pruett@clarkcountynv.gov, or faxed to (702) 383-9994.

AIR QUALITY PLANNING NOTICES

Wed., May 25, 2021 - Public Notice for Proposed 2015 Ozone NAAQS SIP Revision

DES welcomes comments on the proposed revision to the Nevada State Implementation Plan for the 2015 Ozone NAAQS: Nonattainment Major NSR Requirements: Las Vegas Valley Nonattainment Area, Clark County, Nevada (O3 SIP Revision). Under the Clean Air Act and final implementation rule for the 2015 ozone National Ambient Air Quality Standards, Clark County is required to meet certain state implementation plan (SIP) requirements for marginal nonattainment areas.

This O3 SIP Revision is intended to satisfy the nonattainment new source review program requirements for the Las Vegas Valley nonattainment area under the 2015 ozone standard. If adopted, the O3 SIP Revision will be submitted to the State of Nevada and U.S. Environmental Protection Agency as a revision to the Nevada SIP.

COUNTY OF CLARK )

I, Araceli Pruett, declare that I am over 18 years of age and a Senior Planner with the Clark County Department of Environment and Sustainability (DES). I declare that the Revision to the Nevada State Implementation Plan for the 2015 Ozone NAAQS: Nonattainment Major NSR Requirements: Las Vegas Valley Nonattainment Area, Clark County, Nevada was posted on the DES website from May 25 through June 25, 2021. Below is a screenshot of the posting on the DES website at: https://www.clarkcountynv.gov/government/departments/environment_and_sustainability/public_communications/public_notices.php

AIR QUALITY PLANNING NOTICES

Wed., May 25, 2021 - Public Notice for Proposed 2015 Ozone NAAQS SIP Revision

DES welcomes comments on the proposed Revision to the Nevada State Implementation Plan for the 2015 Ozone NAAQS: Nonattainment Major NSR Requirements: Las Vegas Valley Nonattainment Area, Clark County. Revised SIP Revision. Under the Clean Air Act and Final Implementation rule for the 2015 ozone National Ambient Air Quality Standards, Clark County is required to meet certain state implementation plan (SIP) requirements for marginal nonattainment areas.

This SIP Revision is intended to satisfy the nonattainment new source review (NSR) requirements for the Las Vegas Valley nonattainment area under the 2015 ozone standard. If adopted, the SIP Revision will be submitted to the State of Nevada and U.S. Environmental Protection Agency as a revision to the Nevada SIP.

1.6 PUBLIC COMMENT REPORT

Public Notice: DES Website: May 25 through June 25, 2021

Public Comment Period May 26 through June 25, 2021

Formal Comments Received: None
2.0 BOARD OF COUNTY COMMISSIONERS MEETING – 7/6/2021
(SET PUBLIC HEARING)

2.1 AGENDA ITEM

CLARK COUNTY BOARD OF COMMISSIONERS
AGENDA ITEM

Petitioner: Marci Henson, Director, Department of Environment and Sustainability

Recommendation:
Set a public hearing on July 20, 2021, at 10:00 a.m. to approve, adopt, and authorize submittal of the proposed “Revision to the Nevada State Implementation Plan for the 2015 Ozone NAAQS: Nonattainment Major NSR Requirements: Las Vegas Valley Nonattainment Area, Clark County, Nevada” to the State of Nevada and the U.S. Environmental Protection Agency for review and approval as a revision to the Nevada State Implementation Plan. (For possible action)

BACKGROUND:
On October 1, 2015, the U.S. Environmental Protection Agency (EPA) revised the 8-hour ozone National Ambient Air Quality Standards (NAAQS), lowering both the primary and secondary standards from 0.075 to 0.070 parts per million. When EPA establishes or revises an existing NAAQS, EPA must designate areas as meeting or not meeting the standard, and states are required to develop state implementation plans (SIP) that outline how it will attain or maintain the standard. The Las Vegas Valley was designated as a marginal nonattainment area for the 2015 ozone standard, effective August 3, 2018.

Under the Clean Air Act and final implementation rule for the 2015 standard, Clark County is required to meet certain SIP requirements for marginal nonattainment areas. The purpose of the attached SIP revision is to address the nonattainment new source review program requirements for the Las Vegas Valley nonattainment area under the 2015 ozone standard.

The proposed revision was made available for public comment from May 26, 2021, through June 25, 2021. A public hearing on July 20, 2021, will provide the public with an additional opportunity to provide comments prior to the Board of County Commissioners’ consideration of the revision.
2.2 MEETING SUMMARY

ATTACHMENT: Staff Report
ATTACHMENT: Consent_ATT_MLA_Agree_20210706-signed.pdf

20. Approve and authorize the Chair to sign a Wireless Communications Incentive Agreement between Clark County and New Cingular Wireless PCS, LLC, allowing New Cingular Wireless to modify certain terms of its Master Wireless Use License Agreement regarding fees and terms; and providing for other matters properly related thereto. Commission District: All (For possible action)

ACTION: APPROVED AS RECOMMENDED.

Environment and Sustainability

21. Set a public hearing on July 20, 2021, at 10:00 a.m. to approve, adopt, and authorize submittal of the proposed “Revision to the Nevada State Implementation Plan for the 2015 Ozone NAAQS: Nonattainment Major NSR Requirements: Las Vegas Valley Nonattainment Area, Clark County, Nevada” to the State of Nevada and the U.S. Environmental Protection Agency for review and approval as a revision to the Nevada State Implementation Plan. (For possible action)

ACTION: PUBLIC HEARING SET FOR JULY 20, 2021 AT 10:00 A.M.

ATTACHMENT: Staff Report
ATTACHMENT: 20210525 2015 O3 SIP NSR Certification.pdf

Public Works

22. Approve and authorize a proposed settlement in the amount of $43,920 for a partial acquisition of Assessor's Parcel No. 177-07-105-001 (Christopher & Savita Luzak) needed for improvements on Decatur Boulevard between Cactus Avenue and Warm Springs Road; and authorize the County Manager or her designee to sign future escrow instructions and any pertinent documents necessary to complete the acquisition process. (For possible action)

ACTION: APPROVED AS RECOMMENDED.

ATTACHMENT: Staff Report

23. Approve and authorize the County Manager or her designee to sign Supplemental 1 to the professional engineering services contract between Clark County and WSP USA, Inc. (Syndi Dudley, Senior Director) for additional design engineering services for the Interstate 215 and Airport Connector Interchange Phase 3 project. (For possible action)
3.0 BOARD OF COUNTY COMMISSIONERS MEETING – 7/20/2021
(CONDUCT PUBLIC HEARING)

3.1 AGENDA ITEM

CLARK COUNTY BOARD OF COMMISSIONERS
AGENDA ITEM

Petitioner: Marci Henson, Director, Department of Environment and Sustainability

Recommendation:
Conduct a public hearing; approve, adopt, and authorize the “Revision to the Nevada State Implementation Plan for the 2015 Ozone NAAQS: Nonattainment Major NSR Requirements: Las Vegas Valley Nonattainment Area, Clark County, Nevada,” and authorize the Director or her designee to submit the revision, including any relevant public comments, to the State of Nevada and the U.S. Environmental Protection Agency for review and approval as a revision to the Nevada State Implementation Plan. (For possible action)

FISCAL IMPACT:

BACKGROUND:
On October 1, 2015, the U.S. Environmental Protection Agency (EPA) revised the 8-hour ozone National Ambient Air Quality Standards (NAAQS), lowering both the primary and secondary standards from 0.075 to 0.070 parts per million. When an existing NAAQS is established or revised, EPA must designate areas as meeting or not meeting the standard, and states are required to develop state implementation plans (SIP) that outline how they will attain or maintain that standard. The Las Vegas Valley was designated as a marginal nonattainment area for the 2015 ozone standard, effective August 3, 2018.

Under the Clean Air Act and final implementation rule for the 2015 standard, Clark County is required to meet certain SIP requirements for marginal nonattainment areas. The purpose of the attached SIP revision is to address the nonattainment new source review program requirements for the Las Vegas Valley nonattainment area under the 2015 ozone standard.

The proposed SIP revision was made available for public comment from May 26, 2021 through June 25, 2021, on the Department of Environment and Sustainability (DES) and Clark County websites. The attached plan includes changes made to the public review draft incorporating comments received from EPA during the comment period. These changes address typographical corrections to three Air Quality Regulations cited in Table 2.1. No other comments were received. Staff requests the Board approve and adopt this SIP revision and authorize staff to submit it to the State of Nevada and EPA for approval as a revision to the Nevada SIP.
3.2 PUBLIC COMMENT REPORT

Public Hearing: July 20, 2021

Formal Comments Received during Public Hearing: None
3.3 MEETING SUMMARY

63. Conduct a public hearing and approve, adopt, and authorize the Chair to sign an ordinance to amend Clark County Code Title 4, Chapter 4.08, Section 4.08.005 and Title 8, Chapter 8.04, Subsection 8.04.010.145 and Section 8.04.310 to revise the definition of "resort hotel"; and providing for other matters properly related thereto. Commission District: All (For possible action)
