### PROCEDURE TO OBTAIN APPROVAL TO OPERATE A DECORATIVE WATER FEATURE

The worksheet is required in conjunction with approval of an Administrative Design Review to operate decorative water features per Section 30.64.060(3).

1. At Clark County's direction, Applicant shall take completed worksheet and proposed plans to The Southern Nevada Water Authority Conservation Division (SNWA) for review. Plans shall identify the water feature(s) and its water surface area as well as areas of turf proposed to be removed. Applicant may email SNWA for information regarding collection of field measurements ([Patrick.watson@snwa.com](mailto:Patrick.watson@snwa.com))
2. SNWA will review the plans, conduct a preliminary field inspection, and convey the results to the Applicant and County.
3. If a regional conservation program abatement fee is required by the County, payment shall be made to SNWA. The Authority will accept payment and provide a receipt to the Applicant.
4. Applicant will contact SNWA upon completion of water feature(s) and turf removal or reduction of existing legally approved body of water (if applicable).
5. SNWA will conduct a field inspection of the completed project and convey information to the County. Applicant shall apply to the Department of Comprehensive Planning, for an Administrative Design Review (ADR) to operate the water feature. See Table 30.16-10 for ADR process.
6. Current Planning will process the ADR to determine whether additional measures or payments are required per Title 30.
7. Upon notification of approval of the ADR, the applicant may commence operation of the water feature.

Through mutual agreement, the Southern Nevada Water Authority (Authority) will provide technical support to the Clark County Department of Comprehensive Planning by collecting field measurements, collecting and documenting any payments to SNWA required by Title 30. The SNWA's data shall be conveyed to the County for a determination of compliance. The County will notify the Applicant of any compliance issues.

### WATER SURFACE AREA REDUCTION/ELIMINATION CALCULATION

1. Surface area of proposed water feature: <i>Shall not exceed 2% of lot area for first 10 acres or less, plus 0.2% for additional lot area above 10 acres</i>	SF
2. If removing area from an existing water feature, total surface area proposed to be removed	— SF
3. Surface area of water feature required to abate: <b>Subtract Line 2 from Line 1</b>	SF

### TURF REMOVAL (PARTIAL OR FULL) FEE CALCULATION

4. Multiply surface area of water feature to be abated by 20: <b>Line 3 x 20 = SF of turf removal required to allow entire water feature area</b>	SF
5. Square footage of turf proposed to be removed	— SF
6. Subtract SF of turf to be removed from SF of turf required to be removed: <b>Subtract Line 5 from Line 4</b>	SF
7. If less turf removed than required, the total fee calculated as follows: <b>(Line 6 ÷ 20) x \$40</b>	\$

### FEE CALCULATION IF NO ABATEMENT: NO TURF OR WATER SURFACE AREA REMOVED

8. If no turf or water surface area removed, fee* calculated as follows: <b>\$40 x Line 3</b>	\$
-----------------------------------------------------------------------------------------------	----

**\*Make checks payable to Southern Nevada Water Authority Conservation Water Smart Landscapes Program**

Payment shall be cash or check only
