Searchlight Betterment Organization Town Board Report

January 27, 2021

The SBO is now an official member of the Laughlin Chamber of Commerce. We are delighted with all the help they have already given us. In the future we will have a flyer in their office with our Mission Statement and news on past, present and future projects.

In November the first phase of the Searchlight Beautification project was completed. There were 2 Joshua trees planted down Main St and Cottonwood Cove Road by landscapers hired by Equinox Gold. They did an excellent job of placement in a very short period of time. Mr. Aren Hall was the force behind this effort and we are so grateful for all his hard work. To show our appreciation the Searchlight Executive Board would like to present a plaque to Equinox Gold stating a Lifetime Membership in our organization. There will be a second phase to this project so if anyone wants a Joshua tree planted on their property. It's easy! Just email the SBO at sbo89046@yahoo.com and let us know your name, property address, how many trees you would like and a phone number where you can be reached when trees become available.

December was a very busy month with the Toy Drive and the Parade of Lights. Both were very successful. We were able to give every child ages 0 to 17 a gift this year thanks to all the folks that supported our efforts. The winners of the parade were: 1st place Rochel Brown, 2nd place the Marshall Family, and 3rd place Dennys. Thank you to all the entries.

The SBO would like to acknowledge an outstanding youth in our town each year. Lately it seems as if we focus on bad behavior when we should be focusing on good. This year the board voted on a boy who is always there to help and relates well with adults. He is well liked by the

community and is very enterprising. We would like to present the first annual Outstanding Youth award to Jeremiah Lewis. Keep up the good work Jeremiah.

As always if you would like to become a member, donate or volunteer to help with a project you can contact any board member personally or email us and someone will get right back to you. We will be having open meetings again as soon as the pandemic restrictions are lifted.

SEARCHLIGHT, NV 89046
Sbo89046@yahoo.com

To: Searchlight Town Advisory Board & Board of County Commissioners,

The Searchlight Betterment Organization is a small grassroots 501C3 Non-Profit Organization formed to help support, facilitate and fund projects that encourage tourism, economic growth and housing and infrastructure development in Searchlight, Nevada. As well as an overall better quality of life for Searchlight residents.

The old water tank with the flag pole in in the center of town has become more of an eyesore over the years. Tourist lay eyes on it and the first thing to come to mind is that Searchlight is a forgotten ghost town.

We at The Searchlight Betterment Organization believe Searchlight is an amazing historic community with limitless potential for the future. The "Flag Box" as we call it, should be a shining beacon of pride we have for our community for all to see. Whether you are a local Searchlighter, tourist or passerby, the flag box should be a positive conversation starter about our community's beginnings and historic relevance.

We have worked with the Searchlight Historic Museum in finding old photographs to create 8' x 20' foot heavy duty canvas murals. The canvas is specifically designed to withstand our winds and hot summer weather here in Searchlight. Searchlight is a historic ranching and mining community. So we found photographs that accurately display our colorful past while at the same time being easily viewed from anywhere in town, on all four walls.

The second part of this proposed project is to apply solar lighting to the murals in such a way as not to disturb community members while at the same time, sufficiently lighting up the murals for all to see at night. These lights would be mounted on a small slab in front of each wall. This would also help with preventing theft and vandalism.

The Searchlight Betterment Organization has received proposal quotes for the project. For the murals, Wall Sensations has quoted \$5,250. 1 Sun Solar Electric has quoted the solar lighting at \$2,505. Which brings the total proposed Flag Box Project cost to \$7,755. The Searchlight Betterment Organization is willing to donate \$1,200 to the project. Bringing the remaining costs to \$6,555.

We would humbly like to request your support and approval for the Flag Box Project on parcel 243-35-310-083 owned by Clark County Real Property Management. We also would like to request, for your consideration, payment for the remaining costs from The Searchlight Capital Construction Fund 422.

RE: Searchlight Transportation Support

At the February 10, 2021 meeting, the Searchlight Town Advisory Board requested a letter be sent to the Board of County Commissioners to support the continuation of Federal Transit Administration funding for the Southern Nevada Transit Coalition (Silver Rider) for the community of Searchlight.

Public transportation is vital to the community of Searchlight, particularly in these difficult economic times. Searchlight has a high population of senior citizens, as well as low-income residents, who are public transit dependent.

Residents in rural communities like Searchlight have limited services available, making public transportation their only access to normal daily necessities and life sustaining medical accessibility. Although this is the case in many rural communities, transportation is especially critical to the residents of Searchlight who have no other public transportation options currently open to them.

The Searchlight Town Advisory Board appreciates Board of County Commissioner consideration of the request for continued Federal Transit Administration funding for the operation of the Southern Nevada Transit Coalition (Silver Rider) local bus service to provide public transportation in Searchlight, Nevada.

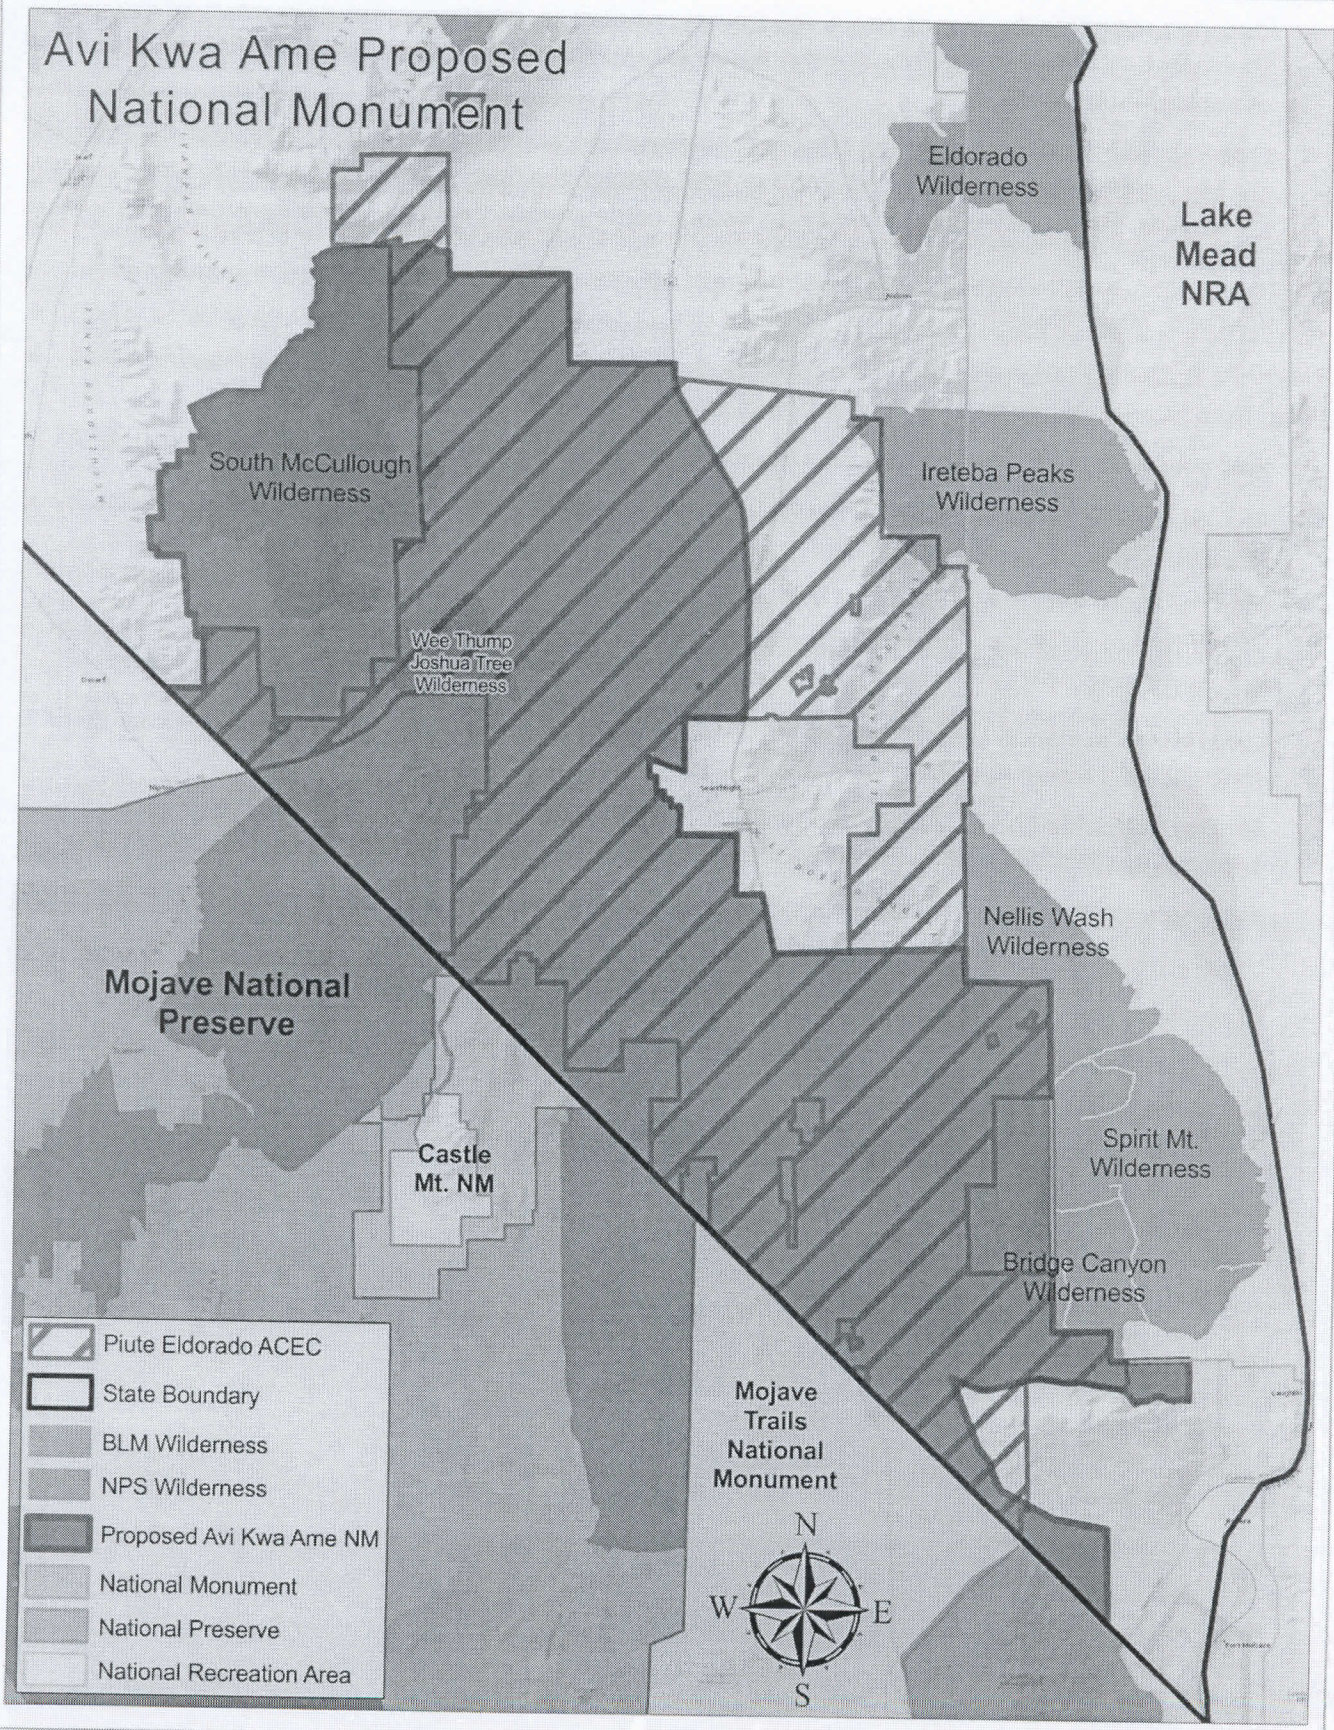

Respectfully submitted,

Help Protect Our Searchlight Public Lands!

Avi Kwa Ame National Monument and What It Can Do For Us

The Problem and Opportunity

- Just a few years ago, a large energy company wanted to surround our town with 440 ft high windmills, threatening our scenery, recreation, and quality of life and disregarding the wishes of our citizens. By working together, we won that fight, and the next, which would have placed even larger windmills across our nearby western mountains. However, there will be no end to these proposals unless we do something more permanent about it.
- Now, thanks to the hard work of our local residents, conservation groups, hunters and other recreational users, we can help stop this large-scale development on our public lands by supporting legislation to establish a new National Monument in our region, Avi Kwa Ame (the Mojave name for Spirit Mountain).
- Much of the area within the proposed 380,000-acre Monument is already part of the Paiute/Eldorado Valley Area of Critical Environmental Concern (ACEC) surrounding Searchlight, and has enjoyed some level of protection, which is why our landscape is still intact as of now. However, a National Monument designation will offer much stronger protection for our future, and add additional federal lands to fill in the gaps in the protected areas, **while guaranteeing our continued access for recreational use.**

What is a National Monument?

A National Monument is a permanent designation for public land established by Congress to protect important values and develop a management plan with local input. Local input means the management of these public lands takes into consideration our local priorities, include possibilities to improve recreational access, promote cooperative conservation, and better preserve our wildlife migration corridors. National Monuments receive funding from Congress to support management including recreation, resource protection and maintenance. National Monuments respect private property rights by only affecting federal lands, not private land, and maintaining public access.

Goals we can achieve with a National Monument

- Protect all of our **existing recreational uses**, including hunting, camping, hiking, OHV use and backcountry driving on existing designated roads and trails.
- Protect **native plants and animals**, including the critical migratory corridors for bighorn sheep.
- Protect our **spectacular views** from large-scale development (such as wind projects) on public lands.
- Protect the **health of residents** by stopping major disturbance of soils in the region that have high levels of naturally occurring asbestos and *Coccidioides immitis* fungi (source of Valley Fever).
- Honor **existing mining claims, private property** and utility rights-of-way within the boundaries.
- Protect **sacred Native American cultural sites and values**.

A National Monument Will Help our Local Economy

- Studies show that national monuments provide economic growth in adjacent local communities. Protected lands help create jobs and continued growth, as well as help sustain property values and attract new investment.
- The greatest value of natural landscapes often lies in their ability to attract and retain people, entrepreneurs, their businesses, and the growing number of retirees who locate for quality of life reasons. This monument can help us maintain our quality of life while helping our community prosper, and preserving our town's cultural heritage.

Features of the Proposed National Monument

- **World's largest Joshua Tree Forest:** Our region is the eastern portion of the world's largest Joshua Tree Forest.
- **Desert Tortoise, Bighorn Sheep and Golden Eagles:** The proposed Monument lands are a rich habitat that supports several dozen special status species, including the Gila Monster, Desert Bighorn Sheep, and Desert Tortoise. These lands support the highest density tortoise population in Nevada and contain important bighorn migration routes. Our area has been designated by Audubon as an "Important Birding Area" with one of the highest golden eagle and raptor populations in Nevada.

- **Cultural Landscape:** Our entire area is considered sacred by the ten Yuman speaking tribes as well as the Hopi and Chemehuevi Paiute. For the Yuman tribes, our area is empirically tied to their creation, cosmology, and well-being.
- **Crossroads of the American West:** This area showcases the progression of human history in the Eastern Mojave Desert, from the ancient Mojave Trail, through the Garces Expedition, the U.S. Army Camel Corps, gold, silver and turquoise mining, to historic cattle grazing, the Walking Box Ranch and the Movie industry.

We Need Your Help!

Help the National Monument become a reality and protect our lands. We need a strong showing of support from local residents to get the attention of our representatives!
